New challenge for | US company offers to drop exclusivity clauses in supply contracts

# Boeing, Brussels near to deal

By Emma Tucker in Brusse Michael Skapinker in London, and Bruce Clark in Washington

Hopes for a settlement of the dispute between the European Commission and Boeing rose sharply yesterday after the US company offered to drop the exclusivity clauses in supply deals it has signed with three US airlines,

Boeing's last-minute concession could pave the way for the European Commission to approve today the planned merger between Boeing and McDonnell Douglas and avert a transatlantic trade war.

still faces opposition from some inside the Brussels executive which will be asked by Mr Karel Van Miert, the competition commissioner, to endorse the deal today.

There were signs the two French commissioners, under pressure from the French government and Airbus, will oppose the Boeing offer.
The climate of negotiations was transformed yesterday when Boeing sent a fax to Mr

It came as political leaders on both sides of the Atlantic sought frantically to prevent the Commission from outlaw-

Van Miert.

But the controversial deal ing the merged company in on Monday. "We cannot in any three critical competition con-Europe – a move which would have triggered quick retaliation from the US.

President Bill Clinton said Boeing had offered a "good faith" resolution to the dead-lock. "Our main concern is that only the anti-trust considerations play a role in the position, and we do everything we can to avoid a more political decision which would lead to an unfortunate trade conflict between the US and Europe." Mr Klaus Kinkel, Germany's

foreign minister, said he had discussed the issue with Ms Madeleine Albright, the US secretary of state, by telephone case let a trade war happen just because the concerned parties have little notion of reality," he said.

Mr Van Miert took the

opportunity of a meeting of foreign ministers in Brussels to outline the content of the Boeing offer to the 15 EU gov-Mr Robin Cook, UK foreign secretary, said after the meet-

ing that a deal was a "very real possibility". The offer by Boeing to scrap the exclusivity clauses of 20year supply deals signed with American, Continental and

Delta airlines, met the last of

New Middle East peace hopes

cerns set out by Mr Van Miert during his five-month investigation of the \$14bn tie-up. He was worried that the contracts closed off too much of the market for too long to rival aircraft manufacturer Airbus

Industrie, the European con sortium. He had rejected Boeing's earlier offer to cut the length of the deals to 13 years. Boeing's refusal to improve its concessions prompted a

venture By Ross Tieman in London and Leslie Crawford in Mexico City

BAT Industries of the UK, one of the world's largest tobacco groups, is buying back control of Cigarrera La Moderna, Mexico's biggest cigarette maker, for \$1.71bn.

BAT had gradually sold its holding in Cigarrera in the 1970s and 1980s under pres-sure from laws hostile to for-eign investment, and finally divested its remaining 45 per cent holding to Empresas La Moderna, a holding company controlled by Mr Alfonso Romo, in 1989 for just \$80m. in a deal signed yesterday, BAT agreed to pay ELM \$1.71bn for 50 per cent of the cigarette business and an option to cancel the remaining shares at no additional cost.

The re-purchase comes three and a half years after Mexico signed the North American Free Trade Agreement, giving foreigners equal treatment with Mexican investors in most sectors of the economy.

BAT's purchase of Cigarrera will be the largest foreign investment in Mexico. Earlier this month the US tobacco group Philip Morris paid \$400m to lift its stake in CLM's chief rival, Cigatam. from 29 per cent to 50 per

CLM claims 53 per cent of the Mexican cigarette market, which with annual consumption of 47bn cigarettes ranks 15th by size in the world. Cigatam has an estimated 45 per cent.

The purchase will add around five percentage points to operating profits from the BAT tobacco business worldwide, which last year totalled £1.6bn, some 65 per cent of the group total. The company said earnings-neutral in its first full year, 1998.

The deal appears to reduce the likelihood of an early demerger of BAT's financial services businesses, headed by Farmers in the US and Eagle

# EU row over paying for enlargement

European Union foreign ministers disagreed openly with each other yesterday over how to pay for the EU's enlargement into central and eastern Europe and how many countries to admit in the next

Mr Robin Cook, UK foreign secretary, warned his 14 fellow foreign ministers that enlargement could not be done on the

He said that "serious" reforms of the Common Agricultural Policy and regional aid budget would be needed, assuming that EU governments followed the European Commission's plans for no real increase in EU spending between 2000 and 2006.

But Mr Abel Matutes, Spanish foreign minister, said bers which include the CAP,

Mr Theodoros Pangalos, Greek foreign minister, said that, with the exception of Cyprus, the applicants had very little experience of democracy, and even less experience of a market economy". Last week, the European Commission unveiled a 1,300page blueprint on enlargement which proposed maintaining the present ceiling on EU spending at 1.27 per cent of EU gross domestic product.

Most EU governments pay applicant countries.

divisions over the costs of enlargement surfaced at the Brussels meeting, notably between Germany, the biggest net contributor, and Spain, the champion of the net recipients.

Mr Klaus Kinkel, German foreign minister, served notice that the Bonn government would demand a cut in Germany's payments to the next EU budget. "The future burden-sharing (in the EU) must be fairer," he said.

The German finance ministry has worked out a plan in which member states' net con-tributions would be capped at certain percentages of GDP. which would reflect different levels of national wealth and the cost of German unification. Mr Cook, keen to avoid a

squabble over money, insisted enlargement could proceed would boost trade and increase only if EU governments security and political stability. respected the rights and obli- "It is not simply an act of gations of the present 15 mem- altruism, it serves very much our own interests."

Last week, the Commission proposed opening accession negotiations to the Czech Republic, Hungary, Poland, Estonia, Slovenia and Cyprus. Those deemed not ready were Bulgaria, Latvia, Lithuania, Romania, and Slovakia.

France, Germany and the UK, backed the proposal. But others, such as Denmark and Italy, thought negotiations should be opened with all the

# **US Federal Reserve chief** warns over interest rates

By Gerard Baker in Washington

Mr Alan Greenspan, chairman of the US Federal Reserve. sounded another strong warning yesterday that the current benign combination of robust growth and low inflation in the US economy was likely to prove temporary. He said the Fed stood ready to raise interest rates at the first sign of

accelerating prices.

Presenting his semi-annual Humphrey-Hawkins report to the US congress on the state of the economy, Mr Greenspan said recent performance had been "exceptional". The current expansion was the third longest since 1945; yet, in contrast to the typical business cycle, measured inflation was now lower than when the

expansion began.
But the Fed's policymakers
had been "puzzled" by the subdued nature of inflation in spite of an unemployment rate

Greenspan: ready to act

he said. "With considerable momentum behind the expansion and labour market utilisation rates unusually high, the Federal Reserve must be alert to the possibility that additional action might be called for to forestall excessive credit creation." Financial markets reacted

positively to Mr Greenspan's prepared remarks, relieved that they did not contain any currently near a 25-year low, explicit reference to concerns

about stock prices. Shortly after he began speaking, the Dow Jones Industrial Average jumped 85 points to 8054.

His presentation included the Fed's latest economic forecasts for this year and next. It forecast overall growth this year to be 3-3.25 per cent, up from last year's 24 per cent. But the rate of consumer price inflation is now expected to be slower than expected. The consumer price index was forecast to rise 2.25-2.5 per cent this year, compared with a projection of 2.75-3 per cent.

in March the Fed raised short-term interest rates by 0.25 points, the first rise for two years, as output surged in the first quarter at an annual rate of 5.9 per cent. The growth rate slowed to about 2.5 per cent in the second quarter, reducing inflationary pressures, but Mr Greenspan said this could be reversed in the

#### EUROPEAN NEWS DIGEST

# EU drafts new workers' rights

The European Commission will today propose new laws guaranteeing part-time workers across the European Union equal rights with their full-time colleagues.

The 20 commissioners are expected to back a draft directive which would enshrine in law an agreement reached last month after a year of talks between trade unions and public and private employers' groups under the EU's so-called social dialogue.

The new law would be based on the Maastricht Treaty's social chapter - only the fourth piece of legislation introduced under the controversial chapter - and would apply to the UK, following the Labour government's decision to end Britain's opt-out.

The draft law says workers should be able to choose freely between full-time and part-time work, without any loss of rights and benefits, such as pensions and dismissal rights if they choose the latter. It would allow EU member states to introduce penalties against companies which did

not respect the law.

The legislation is likely to go before EU social affairs ministers in October. But, since it is based on an agreement already reached between the social partners. the Commission says it will withdraw the proposal if Neil Buckley, Brussels ministers try to amend it.

#### RUSSIAN SCANDAL

#### Bank shake-up demanded

Russia's central bank has demanded the replacement of several top directors at Unikombank and restricted its operations in the government securities market after it became implicated in a growing financial scandal. Last week, Mr Sergei Dubinin, the central bank

covernor, accused Unikombank of illegally diverting state funds and ordered further investigations into its activities. Unikombank has denied any wrongdoing and says it has yet to take any decisions about personnel

The scandal has embroiled some of the country's most prominent business leaders. The central bank investigation appears to be the most serious attempt yet to uproot banking malpractices. Russian police confirmed vesterday that a a shot had been fired Mr Dubinin's apartment although no-one was injured. It was the second John Thornhill, Moscow such attack in 18 months.

#### **E CHERNOBYL PLANT**

#### Last reactor shut for repair

The last operational reactor at the Chernobyl nuclear plant has shut down and may stay idle for months. officials said yesterday. Reactor 3 closed on Monday for annual repairs and is supposed to resume production in 70 days, but plant officials said they needed much more time because they only had a quarter of the necessary

spare parts and equipment – mostly Russian made. Chernobyl's fourth reactor exploded in April 1986 spreading radiation across Europe in the world's worst nuclear accident.

Western countries promised \$3bn in aid in return for full closure of Chernobyl but actual funding has been slow in coming. Ukraine has retaliated by threatening to keep operating the plant, but the shutdown of Reactor 3 eaves it without much bargaining power.

Number 3 has been the only reactor still working since November, when the first reactor was taken off-line. The second reactor has been shut since a fire in 1992, officials say they may switch it back on because they need the Sander Thoenes, London

#### **■ FOOTBALL TRANSFER**

#### Fifa clears Ronaldo move

Pifa, football's world governing body, yesterday authorised the transfer of the Brazilian star Ronaldo, the world's most expensive player, from Barcelona of Spain to Inter Milan of Italy.

However, it ordered the two clubs to reach an agreement on the transfer fee Inter has to pay Barcelona. After spending \$27m last month buying out Ronaldo's eight-year contract with the Spanish club, Inter had argued that it did not have to pay an additional transfer fee for a player who was a free agent.

But Fifa decreed that Inter should compensate Barcelona further for the loss of its biggest star. The Spanish club is believed to have asked for another \$13m from Inter, which has already agreed to pay Ronaldo a \$14m signing fee and a salary of \$3m a year.

The European Commission has warned Fifa that any attempt to block the transfer would break European Union competition laws. Patrick Harverson, London

#### ■ ROME WAR CRIMES TRIAL

#### Priebke found guilty

Former Nazi SS Captain Erich Priebke was convicted by a Rome military tribimal yesterday of taking part in the wartime massacre of 335 civilians. He was sentenced to 15 years in prison, but this was reduced to five years under a long-standing amnesty. Priebke's co-defendant, former SS Major Karl Hass, was

also found guilty. He was given a suspended sentence of 10 years and eight months and allowed to go free. The prosecution had sought a life term for the 83-year-old Priebke and 24 years for Hass.
Last August another military tribunal convicted

Priebke of taking part in the massacre, but cleared him of the aggravating factors necessary to override Italy's 30-year statute of limitations on murder. A new trial was then ordered on the grounds that the first panel of judges was biased in his favour.

# Swiss banks list lost account-holders

By Robert Wright

The Swiss Bankers' Association today takes the unprecedented step of publishing names of holders of dormant second world war accounts in an effort to defuse controversy over their handling of money deposited by Jews who later died in the

Holocaust. A list of about 1,500 names, along with names of those holding power of attorney over accounts, appears in today's editions of 28 newspapers in Europe, the US, Canada, Argentina, Israel, South Africa and Australia, including the Financial Times. The list will also be published on the

of the UK's Holocaust Education property with them during the sec- before 1945 by a non-Swiss citizen, Trust, said the decision to publish the names was welcome, but too

He said: "I have called for these names to be published for years. At last the Swiss are helping Holocaust survivors and victims of the Nazis and their families to recover money placed in Switzerland for safe keep-

Privately, some Jewish groups speculated that the decision to publish now might be related to the launching, in October of last year, of a \$20bn (£11.9bn) class action in the US courts against all Swiss banks on behalf of all victims and survivors of federal reserve.

Mr Greville Janner, the chairman the Nazis who deposited money and The banks list any account opened ond world war. Both Union Bank of and whose owner had not been Switzerland and Swiss Bank Corporation have said they will challenge the charges in court

Earlier this month, the Swiss discovery of owners for a further SFr17m (\$11.5m) in long-dormant accounts, a dramatic increase on the mere SFr1.6m which had previously been traced back to its owners. The publication of the list is part of a process which has seen Swiss banks' famously secret records opened to a commission headed by Mr Paul Volcker, former chairman of the US

heard from in more than 10 years. In October, a list of dormant accounts opened by Swiss citizens in the same time period will be published. Some banking ombudeman announced the Swiss citizens may have opened accounts on behalf of Jews.

Further details of how much is in the accounts and of the reasons for the SBA's actions will be made public today at a press conference in Zurich.

Local offices of the accountants Ernst & Young will deal with claims from members of the public who believe they have claims over listed accounts.

# Lithuanians in the sun

Baltic state reckons it deserves to be a member of the EU

enced both "happiness and tragedy" on a market economy, lurching \$571m. from an export boom to a banking bust, says Mr Vincas Babilius, its economics minister.

But he sees steadler progress in prospect as Lithuania's centre-right government, formed after last October's election, doggedly pursues its ambition of joining the European Union.

With economic growth forecast to reach 4 per cent this year, and as inflation and unemployment rates continue to fall, the biggest of the three former Soviet Baltic states ranks among Europe's better performing transition economies.

Lithuanian officials plan a fierce campaign to persuade EU leaders that their nation has moved far enough to be included in accession talks next year - contrary to the recent recommendation of

the European Commission. "We will do everything possible to change the conclusion of the Commission." vows Mr Gediminas Vagnorius, the prime minister, who accuses Brussels of using "obsolete" data. The fear of Lithuanian officials is that a delay in starting accession talks will damage investor confidence and encourage a reassertion of Russian influence in the region.

Mr Babilius recalls how Lithuania began its economic transformation in the early 1990s when quick-witted entrepreneurs helped their former Communist party masters in Moscow to sell their assets abroad. But this transit trade sucked in hot Russian money, pumping up the banking sector to unsustainable levels. The subsequent collapse of several of Lithuania's biggest banks required a complex financial salvage operation which seriously hampered

In recent months, the government has pushed the reform agenda hard and forged ahead with a privati- tion could prove a big missation programme. Sixty take leading to the politicisaeight per cent of gross domestic product is now produced in the private sector. > The overall improvements in Lithuania's economy are reflected by Standard & Poor's, which last month upgraded the country to an investment grade rating of BBB minus.

"Lithuania's economy did surprisingly well in 1996 given that the money supply has shrunk since the bank ing crisis at the end of 1995," says one western economist "But industrial output is still falling and the banking sector remains weak."

The European Commission argues that Lithuania still faces several big obstacles, including the need to over haul its public finances and restructure its large agricultural sector. But, arguably the most important challenge will be reforming its currency board while maintaining a credible monetary

Lithuania cemented in place a strong anti-inflationary monetary framework in April 1994 by introducing a currency board and pegging the litas to the US dollar at a rate of 4:1. That regime has produced a sharp drop in the annual inflation rate - to 13.1 per cent last year - but has also complicated life for Lithuania's exporters, given the volatility of the US dollar against the D-Mark.

r Gitanas Nauseda director of the pol-▼ ⊥ icy department of the Bank of Lithuania, says the country will now unwind the currency board, introduce a more flexible monetary instrument and move in stages towards a fixed exchange rate with the EU's planned euro - assuming monetary union goes ahead.

However, Mr Steve Hanke, an economics professor at Johns Hopkins University who advised Lithuania on the creation of its currency board, warns such a transi tion of monetary policy and destabilising the economy.

# Bugging report fuels media row in Spain

By Tom Burns in Madrid

A running battle between Spain's centre-right government and Prisa, the domi-nant domestic media group, took a controversial turn yesterday when El País, the group's flagship newspaper, reported that a bugging device had been discovered in the office of Mr Jesús de Polanco, Prisa's chairman. "This is the last straw," said Mr Alfredo Rubalcaba, a minister in the former

Socialist government. "A war is being waged against Prisa on land, sea and air." There is little love lost between the governing Popu-lar party and the Prisa group, which broadly backs the Socialist opposition. The two sides have crossed swords over a digital televi-

sion service launched by Sogecable, the pay-TV unit

of Mr Polanco's media

empire.

A Madrid judge has laid charges against Mr Polanco the decoders it has put on in connection with alleged the market to receive the business malpractice by Sogecable, and the European Commission has warned the government that, by seeking exclusive rights signed by to restrict the start-up of Sogecable's digital services, it is restricting the free with the Popular party's movement of goods and ser-

vices within the EU. Pais reported to be a sophis- mer. This is principally ticated microphone inside backed by the heavily subsi-Mr Polanco's office tele- dised and government conphone is certain to worsen a trolled state broadcaster.

confrontation that is proving increasingly embarrassing for Mr José María Aznar, the prime minister. Prisa claims the law suit against Sogecable has been engineered by the government in a blatant attack on press freedoms.

The government said is would investigate the bugging, which El País said could only have been carried out by "professionals". tive subject in Spain. Reports two years ago that several prominent public figures, including King Juan Carlos, had been bugged led to the resignation of the deputy prime minister in the Socialist government and of the head of Spain's intelligence service.

The launch of Sogecable's Canal Satellite Digital, which is backed by Canal Plus of France, has been opposed by the government at every regulatory turn.
Officials have ruled against new TV service and the Popular party has introduced a "football law" that dilutes

Sogecable with top clubs. The obstacles contrast enthusiastic support for a rival, Via Digital, which is The discovery of what El due to start after the sum-

### New government bows to military demands on secular education

# demand place Ankara stamps on Islamist schools

By John Barham in Ankara

Turkey's new secularist government announced an education policy yesterday designed to stamp out growing Islamist influence in schools, complying with a key military demand after only three weeks in power.

The government decided after an all-night cabinet session to extend compulsory, secularist education to eight years. Islamic schools, which have grown in popularity, will enrol no new children when the school year begins

Mr Hikmet Uluğbay, education minister, said: "This

law is an important step towards attaining the mod-Ithe founder of modern Turkey] wanted." But Mr Necmettin Brbakan, formerly Turkey's first Islamist prime minister, demanded a referendum on the changes which, he said, would drag Turkey back "50 years to fascist, secularist times".

His Welfare party claims the government will be unable to muster a majority in parliament for the legislation, even though it comfortably won a vote of confidence 10 days ago.

The army, which considers itself the guardian of the sec-

ern society [Kemal] Ataturk Erbakan out of office last human rights record by promonth. In February, the generals demanded immediate introduction of eight-year, jailed for infringing the compulsory education to curtail the growth in religious schools, which they claimed threatened the country's stability.

Some commentators, while supporting the government's anti-Islamist offensive, fear it is overreacting. Secularist prosecutors are trying to close Welfare and ban its MPs and leaders from public life. International human rights organisations have criticised the move.

ular state founded by Ata-turk 74 years ago, forced Mr to ease criticism of Turkey's posing to free 124 tournalists, publishers and writers country's's strict security laws. Their jail terms are to be converted into three-year suspended sentences. although they could be jailed for violating the law a second time.

> Islamists have resisted attempts to extend compulsory secularist education since the proposal was first mooted in the 1970s, fearing this would reduce the number of children entering religious Imam Hatip schools.

# Russia to open markets

By Frances Williams in Geneva

Russia vesterday told the World Trade Organisation it would put forward plans to open its markets to foreign competition by the end of ward in its bid to jour the world trade body next year.

Russia's WTO application has made slow progress since it applied to join Gatt, the WTO's predecessor, in 1993. However, negotiations on membership terms have intensified this year.

The US pledged in March to support Russia's entry in 1998, provided it can satisfy WTO obligations, and Mr Anatoly Chubais, Russia's first deputy prime minister. who is spearheading economic reform, bas taken personal charge of negotiations.

Mr Georgy Gabuniya, Russia's vice-minister for foreign trade, told an informal meeting of the WTO membership working party yesterday that Moscow intended to submit an offer on market access for foreign goods. including farm products, in the autumn, and on liberalisation of services towards the

end of the year. Trade officials said improving access for foreign agricultural imports and opening up the services sector, especially the sensitive financial sector, are expected to prove the most difficult areas for the Russian government when detailed talks

begin in earnest. Aspiring WTO members must not only show that their trade legislation and national fair trade rules but must negotiate a package of market-opening measures with all their main trading partners on a bilateral basis. Until Russia submits its detailed offers, on an itemby-item basis, this process cannot begin. So far, the WTO working party has

focused on Russia's current

and proposed trade laws.

# bar Palestinian injury claims

By Judy Dempsey

The Israeli Knesset, or parliament, was last night expected to support the first reading of a new law which would prevent Palestinians injured by Israeli security forces from filing for compensation.

The law, which the government intends to put on the statute books by August 2 when the Knesset goes into summer recess, has been sharply criticised by human rights groups and lawyers as discriminating and "a corruption of the legal system".

Drawn up by the justice ministry headed by Mr Tzahi Hanegbi, the law is aimed at Palestinians who are seeking compensation for injury during the Intifada, the Palestinian uprising between 1987 and 1993. More than 1,300 Palestinians were killed by the Israeli security forces. In fewer than 10 cases, soldiers were convicted of intentionally inflicting injury.
If adopted, Palestinians

would no longer be able to seek through the Israeli courts compensation from Israeli security forces or from the state for injury or death. Instead, plaintiffs would have to redirect their search for compensation to a new committee appointed by the defence ministry.

authorised to grant "out of humanitarian consideration" payment to injured parties or their dependents. Even if compensation were paid out, it would be less than through the Israeli courts professor at the Hebrew Uniand, in some cases, less than the medical bills.

The committee would be

B'Tselem, the independent Israeli Information Centre for Human Rights in the Occupied Territories, said the law was also discriminating because an Israeli or foreign residents would still be entitled to compensation through the courts if injured by the security forces.

Even if Palestinians did had been involved in "a seri-

# poor falls to lowest level

By Michael Peel in London

Aid from industrialised nations to developing countries has fallen to its lowest level since records began in 1950, according to a report yesterday by Unicef, the United Nations children's In 1995 the 21 members of

the Organisation for Economic Co-operation and Development gave an average 0.27 per cent of gross national product, down from 0.34 per cent in 1990. Ms Carol Bellamy, execu-

tive director of Unicef, said the total aid funds of \$58.9bn were "dismal". "That is the smallest amount since statistics on it were first collected in 1950," she said.

"In a \$1,250bn global economy, a quarter of humans are living lives of unimaginable squalor and

The US gave the least, as percentage of GNP, donating 0.1 per cent of GNP. Denmark, by contrast, gave the most at 1.04 per cent. Only Denmark, Norway, the Netherlands and Sweden

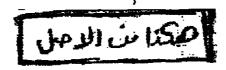

gave more than the UN target of 0.7 per cent of GNP. Although private investment in developing countries increased from \$52bn in 1990 to \$159bn in 1995. Ms Bellamy said most of this had gone to a handful of emerging economies while the poorest sub-Saha-

ran African countries received "a pittance". She said the extra \$95bn that would be raised if the OECD countries met the UN aid target would "break the

back of global poverty", The Unicel report said deaths of young children in developing countries from Aids was forecast to triple by 2010. The US Bureau of Census forecast that 357,000 infants in 19 "high-risk" countries would die of Aids in 2010.

惊痒的 化氯铋

The bureau estimated that 61 per cent of all infant deaths in Botswana, the worst affected country. would be Aids-related.

# offers to open market good mornjng!

There's polystyrene in these yoghurt pots

Approach attitude is what counts. That's what is required to be faster and more flexible than the competition. Which is why we'll be operating on the market as an independent limited liability company from October 1, 1997. Clustering all activities in the field of polystyrene into a single independent company with clear market focus is only one of the many measures to feature in the Global Fitness Program of Hüls AG which in future will take on the role of strategic holding company. This opens up whole new market opportunities, paving the way for us to reach our ambitious goal of becoming a leading supplier. Watch this space for the name under which we'll be starting out. Polystyrene Division of Hüls AG, Marl, Germany.

His remarks were intended to break a potential logjam over healthcare in the final stages of budget talks between the White House and Congress. On Monday. House and Senate Republicans backed away from an earlier proposal to raise premiums and the age of eligibility for Medicare, the sysoeuvred by President Bill tem of public health insurance for the elderly.

Republicans were worried the president would seek to make political capital out of any rises they make in such charges, accusing his opponents of approving what amounts to a tax rise for the elderly. Mr Clinton also offered to let the Treasury, rather than the internal Revenue Service, collect extra premiums, a largely cosmetic move to make them look less like tax increases.

The president's gestures seemed likely to help the negotiations along, but important differences remain before final agreement is reached on the budget, which, in addition to balancing the federal finances in five years, would also cut taxes by \$135bn.

The House and Senate have still to agree on whether to raise tobacco taxes to pay for greater provision of health insurance for children. There are also gaps between Congress and the White House on the administration of extra funds for children's insur-

For Mr Newt Gingrich, the treachery is taking place in the corridors of the House of Representatives. The Speaker of the House. once feted in triumph as leader of the Republican revolution, is now battling for his political survival, sur-

Newt Gingrich: battling for his political survival

In an effort to defuse the row, Mr Gingrich agreed that the plotters should meet his four most senior lieutenants - Mr Dick Armey, Mr Tom DeLay, Mr John Boehner and Mr Bill Paxon. Accounts of the meeting

vary, but according to the plotters, far from damping their mutinous zeal, the four juniors had it not been for men actually egged them on, the extraordinary events and spent much time discussing among themselves

who might be presented as the credible alternative

When reports of the meeting seeped out last week, Mr Gingrich moved. He promptly fired Mr Paxon (the only one he could remove since the other three are elected party officials). All four men offered

unconvincing denials that they had actively abetted the

of his colleagues. The difficulties seem, on the surface, hard to explain.

Though they lost the presidential election last year, the Republicans held on to control of both the House and the Senate, the first time they had been re-elected in Mr Armey and Mr Boehner charge of the legislative

right hand during the vote.

members had gone.

China yesterday reported economic growth of 9.5 per cent in the first half of this year after a surge in exports drove the gross domestic product well ahead of the overnment target.

The economy, however, is increasingly burdened by growing stockpiles and rising losses at defunct stateowned enterprises. The State Statistical

Bureau (SSB) said GDP in the first six months of the year was Yn3,318bn (\$400bn), 9.5 per cent up on the same period in 1996 and up slightly from 9.4 per cent in the first quarter of this year. Exports were valued at \$80.8bn, a 26.2 per cent rise on the same period last year, leaving China on course to outstrip the forecast by the prime minister, Mr Li Peng,that GDP growth would be8 per cent for 1997. Imports fell 0.1 per cent to

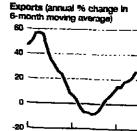

\$63.05bn. resume operation "when Government officials nevconditions on Bougainville ertheless acknowledged the Critics pointed out yesterlooming problem of bankday, however, that Mr Skate ruptcies and mass redundanwould head a government cies after reporting that dominated by the country's losses in the state sector former rulers. That was rose 9.2 per cent to Yn67.4bn despite a clear show of voter in the same period. Profits at profitable state enterprises anger with the old guard, putting 13 new independents were just Yn6bn. into the parliament. In his

"Some enterprises are having economic difficulties and ter, Mr Skate said 50-60 per have seen output decline, or cent of the old government's are not running at capacity and have sent home many workers," said Mr Ye Zhen, eta, the former deputy prime SSB spokesman. minister and Pangu party

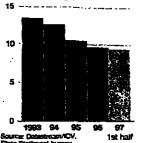

Stockpiles are also rising, signalling a growing problem of over-capacity. Mr Ye said the value of stockpiles held by industrial companies had risen 12.9 per cent yearon-year to Yn569.6bn. The SSB also reported

The new prime minister promised to establish an first-half industrial output inquiry to examine alleged up 11.6 per cent, while fixedcorrupt dealings by members asset investment increased of the former government. 13.5 per cent year-on-year. He also promised peace talks China's domestic market with the Bougainville secescontinued to grow solidly,

China: mixed fortune: Exports (annual % change in

goods up 12.1 per cent in real terms and sales of capital goods up 8.3 per cent over the same period.

Separately, the Ministry of Finance announced rapid growth in tax revenue in the signalled further strain on its national budget by acknowledging that expenditure increases outpaced revenue growth in some areas.

Revenue rose 21.1 per cent to Yn351.2bn, well above a forecast 14 per cent increase, giving China a surplus of Yn38.8bn by the end of June. The sharp revenue increase was attributed to the rise in stamp tax collection, after the rate was raised earlier this year to cool what authorities in Beijing perceive to be an overheated market.

Officials remain concerned however, by the rising nesses and that "fiscal expenditure in some areas had risen too fast, outpacing

# HK legislature faces first court challenge

in Hong Kong

A landmark court hearing challenging the legitimacy of Hong Kong's provisional leg-islature kicked off yesterday with the government's representative arguing that the courts were not qualified to rule on the subject.

The case, which is expected to conclude tomorrow, is being scrutinised closely as the first legal challenge to the Beijing-backed body which replaced the democratically elected legislature when China resumed sovereignty on July 1,

The new regime also came under fire yesterday from protesters who denounced Mr Tung Chee-hwa, the new Beiling-appointed chief executive, for his position on deporting children, labour rights laws and free speech. A new law threatens to deport young Chinese migrants for entering Hong Kong illegally, but critics say the children are entitled to stay because at least one parent is a permanent resi-

dent in Hong Kong. Experts said confidence in the new government and the rule of law would plummet if the outcome of these legal challenges showed judges' impartiality had yielded to

benefits

1116

The case that opened yesterday arose from a corruption trial in which defence lawyers argued that their clients could not be tried because the charges against them ceased to exist at mid-

night on June 30. The case has already been dogged by controversy. At the last minute the legal aid department opted not to assign a senior counsel, despite the importance of the case and the perceived need for both sides to be given fair representation.

The two barristers acting for the defendants subse-quently sought to withdraw from the case yesterday morning, but were told by the solicitor-general that it would be unethical for them to do so. As a result they remained in court with a brief to assist, unpaid.

The court was told by Mr Daniel Fung, solicitor-general, that there was no question that the rules remained the same after June 30.

Moreover, he said, the courts of the Special Administrative Region of Hong Kong had no jurisdiction to rule on the legality of the provisional legislature – just as the courts under colonial rule had no right to challenge acts of the UK parlia-

Later, Mr Ryu- ington has said it has no intention of approach to the political turmoil in taro Hashimoto, Japan's prime minister, said that "even if Japan and the to Prince Norodom Ranariddh, the US share the same goal of establishing

assembly. He stressed that Cambodia should abide by the peace agreement brokered by the United Nations in

# **GLOBAL CLAIMS PROCESS** TO IDENTIFY OWNERS **OF DORMANT WORLD WAR II-ERA ACCOUNTS**

Today, as part of a new, expedited claims process, the Swiss Bankers Association is publishing the list of all known World War II-era dormant accounts of non-Swiss individuals. This initiative will be administered by an international board of trustees and supervised by the Swiss Federal Banking Commission and the Independent Committee of Eminent Persons ("ICEP") chaired by Paul Volcker that was established to identify dormant accounts of Holocaust victims.

- ☐ The published list contains all known dormant Swiss bank accounts opened by non-Swiss customers before the end of World War II. A separate list of individuals who hold powers of attorney to these accounts is included to provide additional information.
- ☐ A list of all World War II-era dormant accounts of Swiss citizens will be made public in October. If any additional accounts are identified by the ICEP audit, they also will be made public.
- ☐ Because some accounts were held jointly and some account holders granted powers of attorney to others, there are more names listed than actual accounts.
- ☐ Ernst & Young, the international accounting organisation, will help individuals to submit claims in connection with the published list. Ernst & Young has set up contact offices in New York, Tel Aviv, Sydney, Budapest and Basle.
- ☐ An international panel of independent arbitrators will evaluate claims under relaxed standards of proof.
- ☐ Claims to published accounts will be resolved as soon as possible with a deadline
- ☐ The Swiss banks are committed to using unclaimed Holocaust-era funds for humanitarian or charitable purposes.

Please come forward. You will receive prompt and serious attention. Thank you.

If you recognise a name on the list and believe you are the rightful owner of a dormant account, or it you have any information that would assist in locating a rightful owner, please complete the Information Kit Request Form and send it to one of the Ernst & Young contact offices listed below. You will receive an information kit written in plain English which describes fully the claims process and explains how to file a claim. Should you have any questions, please call the following freephone number:

Chancellor considers fairness alongside desire for VAT on more goods and services

# Treasury chief snubs IMF's tax advice

and Wolfgang Münchau

Mr Gordon Brown, the chancellor of the exchequer, yesterday attempt to restrain spending. rejected the International Monetary Fund's call for value-added tax to be levied on a wider variety of broad tax base.

In its annual report on the UK broadening of the VAT base warrants serious economic debate, all the more so given the but to spend money. hard choices that lie ahead in Mr Brown said he

reconciling spending priorities". either to extend VAT to non-essensavings, rather than a short-term

The chancellor told the House of Commons Treasury select committee that he stood by his pledge not national autonomy on these matgoods and services, arguing that to impose VAT on food, children's considerations of fairness had to be clothes, transport, books and placed alongside the desire for a newspapers during the current parliament.
There are fairness issues

economy, the IMF argued that a involved here," the chancellor said, adding that these were essentials on which people had little choice

The IMF favours VAT widening as tial items. He also promised to a medium-term policy to promote resist any pressure from the European Commission to harmonise VAT rates with those in other countries.

"We are certain we will have ters," he said. "Any attempt at harmonisation would have to have unanimity and we would ... veto an attempt to do so." Mr Brown already applied.

The chancellor was making his first appearance before the newly appointed select committee.

He came under repeated attack from a Conservative survivor of the committee's last incarnation, Mr Quentin Davies, for failing to levy a significant tax increase on consumers and relying too much on rises in interest rates to reduce

Mr Brown said it was "quite absurd" to argue that the Budget in nearly seven years. had done nothing to curb consumpan attempt to do so." Mr Brown tion or cool the housing market, said he would retain zero-rating for arguing that consumers faced a VAT in those areas where it £1bn tax increase in year two of his plans. Mr Davies said that this increase of about 0.15 per cent of national income would have a negligible effect.

inflation.

cal tightening in the Budget should reduce the rise in interest rates necessary to subdue inflation. He also rejected accusations that he should have done more to address the overvaluation of the pound, which closed at a just under DM3.04 yesterday - its highest rate

"My aim is a stable and competitive pound over the medium term", he insisted. "But I do say to you what worries industry most of all is the threat of a retun to the stop-go economics of the past."

Caught in the current, Page 12

# Wales offered path to own economic rule

By Liam Halligan, Political Staff

The government yesterday set out its proposals to create a 60-member elected Welsh assembly by 1999, to be responsible for the £7bn (\$11.7bn) Welsh Office budget, and for Welsh public services such as schools, hospitals and transport.

The abolition of more than half of Wales's quangos ernment bodies) was also proposed - including the Cardiff Bay Development Corporation - and the creation of a "powerhouse" agency to promote economic development centred on the existing Welsh Development Agency. Cardiff, in south Wales, is the capital city of

The plans, outlined in the

ment A Voice for Wales, were announced in the House of Commons by Mr Ron Davies, Welsh secretary. "Our aim is to improve public services by making them more responsive to the views and needs of Welsh people," he

Mr Davies said Wales would continue to share the same framework of laws as England, including primary legislation made for it by Parliament, and would "remain firmly" part of the

"But the new assembly will assume virtually all of the functions which I currently exercise," he said, indicating that most of the Welsh secretary's powers would be devolved to the Cardiff-based body. Provided the Welsh people

Peter Hain (left), Welsh Office minister, and Ron Davies at the Welsh devolution press conference

ment's proposals in a referendum on September 18, the government expects its devo-hition bill to become law in July 1998, with Welsh assembly elections - using a form of proportional representation – in May 1999.

The document was disthe opposition Conservative

endorse the discussion docu- party. "All the indications are that these proposals will diminish the status of Wales," said Mr William Hague, Conservative leader and himself a former Welsh secretary. "It will mark the marginalisation of Wales within the UK and damage the prospects for future missed as "incoherent" by inward investment and

Wales, where the Labour assembly elections would party holds 34 seats, was in danger of becoming a oneparty state, Mr Davies said: Because 20 of its 60 members will be elected from party lists, in proportion to total votes cast, this body will reflect all parties'

Addressing concerns that that the proposed Welsh represent Britain's "first use of proportional representation". Under the proposals, Wales would continue to

send 40 MPs to the House of Commons. The post of Welsh secretary would remain, partly to act as a link between Wales and central Mr Davies also stressed government in London.

over

for success are in place. Not all our members argued for this specific line some prefer a more sceptical approach, some an unreserved commitment to early entry. But a large majority can support this conditional commitment to membership of Emu. I believe it is the best policy for Britain.

For some, Emu is primarily a political question. Some believe it a necessary precursor to a desirable political union: others a threat to national sovereignty. And it would be absurd to deny that Emu has a political dimension. But I think some of these arguments are over-

National economic sovereignty is constrained by the facts of economic life. The issue is how to maximise economic success, not the illusion of national control. It is on the economic arguments for and against that we need to focus.

Emu could bring big economic advantages, but only if it goes ahead under the right conditions: if those conditions are not in place, it could do harm.

The potential benefits of Emu are transparency, certainty and stability. Emu would help complete the single market; with everything priced in euros, competition would be more open and omy, a volatility which the Emu could create major intense, bringing lower US, with its much smaller problems.

months of consultation, and many more halo cot help set up a

> prices for the consumer and stronger companies better able to compete across the world. Emu will create a single European capital market for debt and equity – a more allocating savings to the highest-return investments.

also eliminate intra-European exchange rate risk from future trade and investment decisions, focusing companies on the fundamentals of business - productivity and quality - rather than on managing financial risk. The benefits of that risk elimination could put the UK at a disadvantage if a successful Emu developed and Britain stood permanently aside.

Equally important, Emu would remove, in respect to the 58 per cent of our trade with the EU, the damaging impact of large irrational exchange rate overshoots. Sterling's 30 per cent appreciation against the D-Mark over the last year - despite almost identical inflation must be set by the competirates - is severely disrupting long-term planning among UK exporters to Europe. A first unsustainable boom and then recession in Italian manufacturing in 1995-96. Eliminating those swings will remove unnecessary volatility from the real econ-

percentage of gross domestic In an ideal world, those product traded across currency boundaries, does not argue for great caution have to face.

about the speed of and phas-

cant potential advantages, tion. Inflation rates across and while indeed there are Europe have converged to a By Stefan Wagstyl in London of the support of the "vast risks for Britain if we stay surprising extent, but the fispermanently outside Emu, cal positions of many poten-there are also major risks in tial participants fall short of monetary union particularly obvious sustainability and if it goes ahead under the wrong conditions.

For the single currency to succeed, inflation rates must have converged, existing efficient mechanism for exchange rates must be sustainable, and the public finances of members must be Monetary union would sound.

More vitally still, if we abolish exchange rate flexibility, which can help bring not be available. The politireal wages in line with productivity levels, we need the alternative of labour market flexibility. For Emu to work. wages in different regions

That Emu will go ahead in less than ideal circumstances is the context in which Britain must decide

tive circumstances of the companies based there - the wage rates at a car compasimilar roller-coaster in the ny's plants in Germany and start. Britain's ability to Lira/D-Mark rate induced in Spain must be set by local argue for that development conditions and productivity not by pan-European collective bargaining. If European labour mar-

kets evolve in a less rather than more flexible way, then

But while Emu has signifi- ing of Emu's implementathe direction of EU labour market policy remains

unclear. In theory there are good arguments, either for only a small core group pro-ceeding in 1999 or for the whole project being delayed for several years. Equally, however, we have to live with the reality that

the ideal path to Emu may cal momentum behind the 1999 timetable is huge, and delay itself could bring major economic costs through exchange rate volatility and higher interest rates on government borrowing. The likelihood that Emu will go ahead in 1999 but in less than ideal circumstances is the context in which the UK must decide its policy.
That policy should focus

on ensuring the emergence of a successful Emu, which Britain should then join. That means arguing for the conditions required for Emn's success - conditions which ideally would be in place before Emu proceeds, but which could also develop in the years following Emu's will be enhanced if it is clear that our desired end point entails both Emu's success and Britain's essential membership.

# Proposals urge BT charge cuts

British Telecommunications will be forced to cut the charges it levies on carriers using its network by 28 per cent in real terms over the next four years, under propos-als tabled yesterday by Mr Don Cruickshank, director-general of the telecommunications regulatory body. The proposals, which were welcomed by both BT and its rivals, are designed to foster competition and are expected to lead to a further reduction in telephone bills. The opening of the industry to competition has meant calls often have to travel over the lines of several operators before arriving at their destination.

By lowering the costs BT charges to other operators to use its lines - the most comprehensive network - all companies should be able to make reductions in their bills. Oftel also hopes the move will also encourage more operators to come on to the market Paul Taylor

**■** CONSTITUTION

#### Centrist party gets committee role

Mr Tony Blair, the Labour prime minister, yesterday offered the centrist Liberal Democrats a seat at the heart of government, and a key role in developing proposals to change the voting system for general elections. A new cabinet sub-committee is to be created on which senior ministers and top Liberal Democrats will discuss issues of common concern, including constitutional reform. The prime minister's office said Mr Blair viewed the committee as a move towards "a new era in British politics", but insisted it would not to lead to a formal pact. A spokes man said ministerial jobs for the party leader and his coleagues were "not remotely on the agenda".

Senior Liberal Democrats were delighted with the deal, which gives them their strongest voice in government since the 1978 Lib-Lab pact.

George Parker Editorial Comment, Page 13

**■ TELEVISION** 

#### Changes urged in ITV licensing

The Independent Television Commission, regulatory body for commercial television, wants to drastically reduce the fixed "cash bid" sum that ITV companies will pay to the Treasury when licences are awarded.It wants to ensure that most of the special taxes paid by ITV to the government should be in the form of a percentage of advertising and sponsorship revenue. This means that if ITV advertising revenue declines, the amount of money paid in tax will also fall. Sir Robin Biggam, chairman of the ITC, said yesterday: "We feel this is a more equitable basis on which to tax (the FTV companies). It is linked to your ability to pay." He was speaking as the ITC published its consultation document on how it will approach the renewal of ITV licences.

**■ HIGHER EDUCATION** 

#### Ministers asked for clampdown

Ministers are to be asked to clamp down on the creation of new universities because of fears that the quality of higher education is being threatened by the rising number of degree-awarding institutions. In a long-awaited report, to be published today by Sir Ron Dearing's committee - likely to signal the biggest shake-up of universities since the 1960s - the government is also to be told that there should be no growth in degree level qualifications offered by further education colleges, which generally offer sub-degree courses.

Its views could jeopardise the future of the government's flagship proposal to launch an internet-based "university for industry" for underpinning the drive to improve skills in the workplace. The number of higher education institutions has mushroomed from 31 to 176 since the last major review of the higher education sector in the early 1960s - with the number of "universities" totalling 115.

■ NORTHERN IRELAND

#### Weapons setback for peace talks

Pro-British unionists are set to vote down UK and Irish government proposals for the next stage of multi-party talks. Officials said that after discussing the issues for the third time in five days with Mr David Trimble, leader of the Ulster Unionists, the largest of three unionist parties, Mr Tony Blair, prime minister, could not make the necessary assurances to secure support for today's vote. All three parties are expected to reject the proposals setting out at what point during negotiations paramilitary groups notably the Irish Republican Army, the military wing of Sinn Féin - must start to hand in weapons. The Rev Ian Paisley, leader of the smaller Democratic Unionists, said after meeting Mr Blair that the talks process was "dead in the water". He described the government's approach as an "Iscariot act of betrayal". John Kampiner

FOREIGN INCOME DIVIDEND SCHEME

#### Government announces rethink

The government last night pledged that it would complete a consultation exercise on the future of the Foreign Income Dividend Scheme by the spring of next year in a bld to allay the concerns of UK multinationals over the issue. As opposition Conservative MPs accused the government of abandoning an important feature of Mr Gordon Brown's recent Budget, Mr Geoffrey Robinson, paymaster general, said that a final decision on whether Fids should be scrapped would be announced at the time of the

However, Mr Robinson yesterday acknowledged that many multinational companies had expressed concern that the legislation was defective. He said he was prepared to listen to representations on how the clause might be amended in the chancellor's next Budget. Conservative MPs yesterday rounded on Mr Robinson

during the committee's debate on the clause, claiming that it epitomised the haste with which the Budget had been drawn up.

# Boardroom rules report may take softly softly approach

The Hampel committee on corporate governance met yesterday. The latest corporate for what could be the last time before publication of its preliminary aware of a certain anxiety over the business history, direction they may take. direction they may take.

#### INFORMATION TECHNOLOGY

# A program of organisation

or centuries the address book and diary resisted modernisation, but now a new breed of software promises to do for businesses what the personal organiser has achieved for individuals.

It is called contact (or business relationship) management software, and promises to shake up work processes while retaining the flexibility, accessibility and security of its paper-based forebears.

While a personal organiser helps an individual manage contacts and appointments. the new software works as a "corporate information manager". It acts as a 'smart" address book and diary, and organises tasks network-wide by creating, linking and indexing faxes, letters, documents, e-mail and contacts to personal

Computing is generally organised by tasks. attaching data records to projects – for example, "this fax was sent to Jones and Smith", which says nothing about what else Jones or Smith had received from the company. Contact managers are organised around people - "Jones was sent Fax 1, Letter 2 and e-mail 3". Contact managers are regarded as "enterprise software" because all workers in an organisation have all the information about a

"Enterprise software is shifting its focus from expense controls and employee productivity improvements, to revenue generation and creating greater external custome satisfaction," says Bob Austrian, a software analyst at Montgomery Securities of the US.

European software developers such as Norway's SuperOffice and Germany's Aurum lead the way in producing networkable boxed products, but European

companies lag behind their US counterparts in using the software.

In Europe many financial organisations. such as Midland Bank and Allied Dunbar, are looking at contact management software, and some, such as the Royal Bank of Scotland and Guinness Mahon, have already jumped in.

"Bespoke applications were considered but cost over £2,000 per user and took too long to implement," says Douglas Alston, head of sales support, commercial banking services at the Royal Bank of Scotland. "RBS was pushing retail banking and needed a quick installation, the boxed products were a fraction of the cost at around £200 per user and required little staff training or skilled installation."

At Guinness Mahon, Tim Stannard, IT manager says: 'Contact management has become the front end of our system for our users. Our word processing, databases and document management are accessed from within SuperOffice and Windows just sits at the bottom. Contact managers have

developed along two paths. integrated and networkable. Integrated solutions have their own database and correspondence templates for e-mailing, faxing and contacting the outside world. They are the simplest and cheapest to install but act independently from existing programs on the

Networkable solutions tie in with the company's existing programs, such as the database and e-mail. word processing. spreadsheet or accounting packages. Data entered anywhere in the system are therefore automatically

updated everywhere else. Mark Selway Using the internet • Geoff Nairn

# Shoot the e-mail messenger

Not only is the internet unreliable for business but it is as secure and private as 'sending postcards'

users would spend anxious hours waiting for urgent telegrams to be received over slow and unreliable networks.

Last week a series of glitches and errors in the US brought traffic on much of the internet to a halt, bouncing millions of e-mail messages back to their senders; internet users must be wondering how much progress has been made.

The internet has brought e-mail to the masses but failures are common and the shortcomings of current technology are familiar to many; messages that cross the Atlantic in minutes may take hours to reach someone in the same city; e-mails are returned marked "undeliverable" because of a technical incompatibility; anxious senders transmit the same message several times not knowing if it has been received.

The problem is particularly relevant to electronic commerce. Internet mail could revolutionise business-to-business trading because it offers a cheap and universal method of transferring bids, invoices and payment advices between trading partners.

The European Commission, for example, would like to make public procurement more efficient in the European Union by introducing electronic tendering, invoicing and payments. However, such projects are destined to remain on the drawing board unless the IT industry can address two fundamental weaknesses of internet mail: security and reliability.

the internet for processing transactions, a higher level of reliability is required than is currently available from e-mail systems," says Joyce Graff, research director with the Gartner Group, the US market research firm.

e-mail over the internet, the sender

n the mid-19th century, when has no way of knowing that the bid telegraphy was in its infancy, was successfully delivered and before deadline. The internet is also inherently insecure and few businesses are prepared to send bids or other confidential information via the system.

"One of the biggest inhibitors of electronic commerce over the internet is security," says Roger Dean, executive director of the European **Electronic Messaging Association** (Eema), a trade body that aims to improve technical standards.

Internet technologies have made enormous strides in many areas. but e-mail has been largely overlooked. The technical standard for handling e-mail on the internet, Simple Mail Transport Protocol, lacks features such as delivery notification and directory services that have long been taken for granted in the proprietary e-mail systems that companies use for internal communications. These proprietary systems work well if sender and receiver are using the same system, but many companies have several different e-mail systems - some a decade old - and incompatibilities are common.

Internet mail has traditionally been a low priority for corporate IT managers but this is changing as more companies look to replace their traditional networks with intranets and extranets. These networks use the same standard technologies as the public internet to link users within a company (intranet), or suppliers and partners outside (extranet). Intranets and extranets can thus

be accessed by any type of com-'As the market evolves to using puter using cheap off-the-shelf internet software, such as web browsers, e-mail programs and groupware - software to share documents or schedule meetings.

Analysts believe it will be several years before extranets replace specialised electronic trading If a bid for a contract is sent by systems, such as the electronic stock control program using polled were so concerned about data interchange networks used in

the motor industry and other sectors. The reason is that internet mail was designed primarily for interpersonal communications and so lacks the reliability and accountability features needed for electronic trading.

The Gartner Group estimates that 15 per cent of internet traffic in 2000 will require a more reliable messaging technology, and the IT industry is working on various initiatives to ensure that messages on the internet get through. For example. UK networking company Nexor recently announced a messaging product that goes beyond the internet SMTP standard by offering a delivery notification mechanism. And some large internet service providers (ISPs) are considering renting secure links on the network to offer a premium service with a guaranteed delivery time.

Last April, the Business Quality Messaging group was set up by IT heavyweights such as Microsoft. Intel, Hewlett-Packard and International Business Machines. It aims to develop messaging technologies to make business-to-business commerce a reality by, for example, allowing a supplier's billing system to communicate with a customer's

Order entry or stock control systems have traditionally been mainframe-based, and to do these applications on an intranet or extranet using e-mail requires sophisticated message tracking and mechanisms so that if an order is changed, for example, all applications thereby affected will be undated.

IBM has announced the first and so far only - product that supports BQM. The product, called MQWare, is a scaled-down version of software that IBM sells to handle transactions in stock exchanges and banks. Microsoft is working on competing product called Analysts believe it will be sev-

erai years before BQM comes close to its goal and critics say the group is not representative because it lacks important names from the internet world, such as Neiscape and Oracle.

A more pressing problem for internet mail is security. "Sending e-mail over the internet is like sending postcards. Anyone can read them," says Chris Taper. chairman of the Eema security committee. According to an Eema survey. 53 per cent of businesses security that they did not use the

internet for commercial purposes. Pharmaceutical companies, for example, would like to use e-mail to send patented information between their various laboratories but security issues prevent them.

Yahoo!'s geek-free area Some intriguing

demographics for would-be internet advertisers have emerged in a survey conducted by Continental Research on behalf of Yahoo! Europe, the internet media company joint venture with Softbank. The study shows Yahoo!'s audience is upmarket and not at all "geeky". Most are affluent homeowning professionals with a family life who use the internet to improve their lifestyle.

Among the findings: 85 per cent of respondents in the UK are male and just under 60 per cent are aged between 25 and 44. The average household income is £44,000 (almost three times the national average) and three-quarters of them own their homes.

Despite recent scares, Yahoo! UK users are confident about the security aspects of shopping online, with 57 per cent believing it is as safe or more safe than ordering by telephone and 42 per cent saying they plan to start shopping online in the next 12 months.

The internet has also contributed to a shift in leisure pursuits among this group. More than half now favour sitting at a PC to watching television. More than half also said they send fewer letters and memos because they prefer

and older tablets. Wacom: Tel, Germa 2131123929; Web http:// www.wacom.de

#### At home with virtual reality

Interior design software packages have generally suffered from two failings. Either they are too simplistic and unrealistic. or they are very expensive

The £29.99 package has been developed using

Interior Design 2.

and require specialist

This week, however,

Europress, the UK-based

entertainment, education

publisher, is launching 3D

and lifestyle software

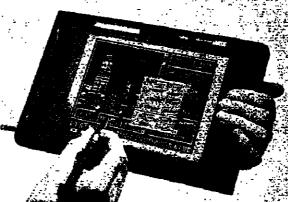

hardware.

Superscape's virtual reality authoring software and claims to be the first VR-based interior design product for the home market. Using the software is

designed to be both powerful and easy. Once a room's dimensions have been input, more than 600 furnishings, fittings and textured objects are available from the virtual clip art library and can be dragged and dropped into the room space. To add realism, many of

the objects have "intelligent characteristics" - for example, the curtains can be drawn and television channels can be changed. The software consists of

Windows NT's longer reach

Pujitsu Personal Systems has launched what is claimed to be the world's first mobile pen computer - or pen tablet to run Windows NT, the "industrial strength" Microsoft operating system. The California-based Fujitsu subsidiary says this will allow enterprises to use 32-bit applications in the furthest reaches of their organisations. The Stylistic 1200, expected to be priced from £2,100, is also available with Windows 95 or Windows for Workgroups 3.11. Fujitsu Personal Systems (Louis Jouanny), tel France 155668686, fax 155668687.

three main modulés, planner, editor and visualiser.

Within visualiser, the camera mode records movements and plays them back as an animation, while human mode allows the user to set their height before walking about a room. The software can also calculate wall and floor

#### Affordable mechanical modelling

The battle to control the market for mid-priced mechanical design software has intensified with the release of PT/Products 2.0 by US-based Parametric Technology, writes Andrew Baxter.

Parametric released the first PT/Products - a slimmed-down version of its high-end Pro/Engineer software – two years ago. The latest release has several enhancements, including an improved user interface, a better sketcher and a new module for designing sheet metal

The mid-range market has developed fast over the past two years, in response to customers who want to migrate from a simple two-dimensional design product to 3D solid modelling, but do not want to pay up to £20,000 per copy for a high-end package.

The main competitors in the mid-range sector, where prices range from £2,500 to £5,000, are Solid Edge, produced by Intergraph. and SolidWorks. Last month France's Dassault Systemes, best known for its high-end Cutia software, agreed to buy privately owned SolidWorks for about \$310m.

PT/Products 2.0 is priced from \$3.000 in the US and from £2,680 in the UK. where it was launched last week by value-added reseller Definitive Applications.

bigwig, but Wenham had special qualities, not just professional but social: he and his wife, Liz, were at the centre of what seemed to be an endless network of friends. From time to time, gamekeeper

Wenham turned poacher and wrote this column. Had this been one of his, what would he have found to admire in the past week, and, not being a man to suffer fools gladly, what would he have eviscerated? It is midsummer, of course, and the worst time of year for new or unusually good programmes, yet I suspect he would still have found much to praise. First, as a lifelong music lover and passionate devotee of the Proms, he would have watched the opening night of the 1997 season and histened simplianeously to the Radio 3 transmission. (Actually he would have been there, but let's pretend . . .)

He would, I suspect, have approved of Bob Coles' direction of the programme not only for what he did, but for what he did not do. Watch the televising of orchestral concerts almost anywhere else in the world and you risk seasickness: the crash zoom into the trombone bell, the zip pan to

the blonde oboe player, the cut to a shot from the ceiling, mixing through to a fuzzy outline on which you pull focus to reveal a reflection in the tuba. the bounce from one camera to another in imitation of some fast rhythmical passage of music – all this frantic malarky is standard in most countries. The BBC still respects its public enough to televise this sort of event with an intelligence which takes the development of the music into

aving been so closely involved as a producer with factual programmes, Wenham would probably have watched this year's three Hypotheticals on BBC2 - once his own channel - and might have reflected that, while these discussions of employment policy were not the very best *Hypotheticals* ever made, the formula was still working well and revealing what otherwise, so often, remains hidden. (They were reviewed in Saturday's FT.) No doubt he would also have watche Neighbours From Hell on ITV with its

dreadful - yet sometimes undeniably funny - litany of spite and conning: pig manure under your neighbours' window, fast growing evergreens to steal your neighbours' light and view, closed circuit cameras to catch them flicking handfuls of soil into your fishpond. However, he might have felt that the final case, involving racist persecution, up to and including attempted murder, was in a different category and (thanks to some excellent and terrifying vérité footage)

deserving of a separate programme But, despite his interest in politics. industry gossip, and talk generally, and consequently in talk shows, I suspect that the programme which might have captured Wenham's imagination most was the second in the Channel 4 series The Deep, about life in the deepest parts of the ocean. I am not aware that he had any particular interest in matters sub-acqua, though he certainly loved most aspects of the Mediterranean area, but he did appreciate professionalism in any sort of programme making and The Deep is highly professional. Furthermore,

there is a philosophical, even a metaphysical, side to these programmes, especially to the seco in the series on Sunday, which would have appealled to Wenham.

Like most of us he would have goggled in fascination at the 30-foot oarfish, the vampire squid (very bad news, like a barrage balloon with Dracula teeth) and the bizarre nanomia which looks like a bundle of television aerials. But what would surely have engaged his mind was the revelation of what the most recent deep-sea discoveries have shown about our previous beliefs concerning life on earth. Sunlight necessary for all life? Insects the most numerous life form? Moderate temperatures needed for life to begin? Thanks to the modern equipment shown in last week's programme, we now know that the 'black smokers" on the ocean floor. miles from any sunlight, which spew out volcanic matter at 850 degrees centigrade, are surrounded by billions

of shrimp.
In the mud below the ocean abyss lives "the most abundant and successful life form on this planet":

microscopic worms called nematodes which - and this is the mind-boggling bit - may have their counterpart in a deep inner sea on one of Jupiter's moons which was recently photographed by the Galileo probe. It sounds almost post-Darwinian, and Wenham would have revelled in the new vistas being opened up, and in the way that television was so early into an area which is now spawning books at an amazing rate.

In the area of arts and entertainment, he would hardly have been greatly impressed by this week's Omnibus which asked "Whatever Happened To Clement And La Frenais?" and, having told us - they have been living for years in Los Angeles (was there somebody who did not know?) - failed completely to tell us why. Why did they go in the first place, at the height of their fame as creators of Porridge and Auf Wiedersehen Pct, and why do they stay now that they seem to be employed as un-credited script spin-doctors. On the other hand, Wenbam might well have felt that midsummer was a good time for repeats of Pride And Prejudice on BBC1 and The Jewel In The Crown on Channel 4, two of the best serial adaptations in the last quarter of a

Born in 1937, Brain Wenham lived only 60 years, but he was centrally involved in what may prove to be the richest years of British broadcasting. Richest in programmes, that is,

#### Opera/Richard Fairman

# **Pantomime** Rossini saved by its star

Rossini in earnest did not start out as its audiences might have hoped. The first opera the festival chose was the little-known, gloomy Ermione two years ago - an interesting rarity and splendidly done, but hardly the operatic fare to go with a summer picnic.

This season patience has its reward. Le Comte Ory is one of the select group of can hope to tickle the ribs of an opera-going public brought up on television sitcoms. What other opera includes a chorus of drunken nuns or a trio in which a cross-dressing man accidentally mistakes the woman he man? Fail to get a laugh out evening's main assets. of that and the producer should be shown the door.

For its new production, which opened on Sunday, Glyndebourne entrusted the Circus, he could guarantee some clowning. But as the show sets out at near-pantomime level, with a latecomer wandering on to the stage clasping his picnic-hamper and a herd of model cows trotting across the backdrop, any sentient brain has to stop and ask what grown men and women are doing taking opera like this seri-

ously. The answer does not come until halfway through the first act, when the toy drawbridge of the castle is lowered and the reason for being there walks on and starts to sing. Her name is Annick Massis and she is a class act who raises the level of the whole game. So often these high coloratura Ros-

he promise that sini parts attract singers Glyndebourne was who operate like mechanical going to take up dolls, but Massis's expressive soprano is so much more - a voice of smiles and tears with a human face and she is also a beautiful and subtle comedienne.

With her help the music comes into its own. Rossini knew all about getting value out of his assets and for this opera re-cycled a lot of his earlier score for Il viaggio a Reims. How it is that Le Comte Ony can seem to have Rossini comic operas that a delicacy of its own is the composer's secret. I am inclined to think that Glyndebourne's music director, Andrew Davis, is on better terms with the rumbustious Italian Rossini than his subtle French twin brother. but he gets brilliant playing desires for a different from the London Philharwoman who is playing a monic which is one of the

s in so many Rossini operas. main tenor role is a killer. Marc Laho, job to Jérôme Savary. As as Comte Ory himself, has a founder of Le Grand Magic serviceable voice that manages the fast runs and high jumps very commendably, but his singing never quite turns a sport into an art. Like a pole-vaulter going for a lifetime best, he runs up to the impossibly high Cs and Ds with all the vigour he can muster, but the sound is loud and coarse, where some soft artistic shading would have been more welcome. Still, he does well enough, so it seems mean to complain.

In the role of the principal boy, Isolier, Diana Montague has the ideally youthful high mezzo voice for the part and looks great in the page boy's blue satin tights. Ludovic being a native Frenchtongue-twisting aria and

Liam Halligan on the pros and cons of Welsh devolution

On the constitutional Richter scale, creating a Welsh assembly ranks far scottish parliament. But because the outcome of the Welsh referender. lower than establishing a Welsh referendum appears to be less certain, with the covernment facing the real possibility of an upset, the campaign is likely to be fought more viciously.

That campaign began officially yesterday with the publication of the white paper - A Voice for Wales which sets out detailed plans for a directly elected Welsh assembly in Cardiff. "This is the first step in a process which will modernise and improve the British constitution," says Mr Ron Davies, Welsh secretary.

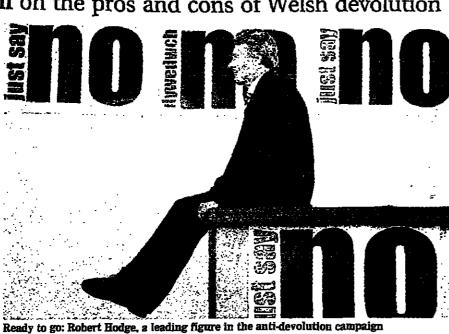

But unlike the proposed Scottish parliament, which could have limited powers to raise income tax rates, the Welsh body would have to settle for a block grant allocated by London.

"Ron [Davies] will be reduced to a bookje's runner, taking messages from Cardiff to Westminster and back again." says Mr Nicholas Bourne, a Conservative who sits on the steering committee of the Welsh "Just say No" campaign.

The government shruggs off such criticisms, pointing to recent opinion polls which suggest the Welsh will vote marginally in favour of devolution on September 18. But Labour is well aware that the Welsh business community, which helped secure the four-to-one rejection of devolution in 1979, remains

The Welsh CBI is particularly concerned that Wales' success in attracting some £10bn of inward investment over the past 15 years could be compromised. "An additional layer of government indicates an extra tier of bureaucracy," says Ms Elizabeth Haywood, director of

CBI Wales. Ministers claim the assemiticians from all parts of Wales, will be able to reach speedy business decisions. be business-friendly, but raising powers. "The white Peter Hain, Welsh office

says that even though there not one Conservative among the 40 Weish MPs. spending priorities on roads, schools and housing are largely determined by quango bosses appointed under the last government. There is deep anger and

frustration that we are still presided over by Tory placemen and women," he says. Quangos are the public face Business also worries that of the corruption of our public life."

The white paper proposes scrapping nine quangos as a first step, with another 20 being disbanded after assem-

bly elections in May 1999, "A lot of quangos will be culled under the control of the assembly," says Mr Hain, "Once they are no longer controlled by the secret cabals of failed Tory politicians, we will have filled the Welsh democratic deficit."

Under the devolution plans, the assembly will have responsibility for all public services currently run by the Welsh office - including health, education, and agriculture, but not social security or law and order. The government, while adamant that the assembly will be good for the economy. accepts that the quango overhaul will result in some

job losses Several opponents of devolution - not all of them Conservatives - say public concern over the quangos unaccountability does not justify devolution. "The government could scrap the quangos by repealing their status at Westminster, instead of giving their functions to an assembly," says Mr Llew Smith, Labour MP

for Blaenau Gwent. But ministers remain confident the Welsh will vote for devolution anyway. "Attitudes have changed since 1979," Mr Davies says. As his opponents will be reminding him, he was a No campaigner last time around.

## ·LETTERS TO THE EDITOR.

Number One Southwark Bridge, London SEI 9HL We are keen to encourage letters from readers around the world. Letters may be fored to +44 171-873 5938 (please set for to 'fine'). e.mail: letters.editor@ft.com Published letters are also available on the FT web site, http://www.FT.com. #### British people need informed debate on single currency

Sir, Our decision on whether or not we join the single European currency. now or in the future, will have a major impact on the UK's future prosperity. To get this vital decision right, the British people need to be properly informed about the arguments on both sides. Unfortunately, the debate on the single currency in the UK so far has been conducted in an atmosphere of ignorance and prejudice.

The government is to be congratulated for publishing a paper setting out the advantages and disadvan tages of British membership of the single currency, and urging a wider national debate. A Gallup poll just released by the European Movement shows 91 per cent of the population support

publication of such a paper. Contrary to Eurosceptic propaganda, the poli also shows British people to be open-minded about the single currency. They want to hear the arguments before they make up their minds. There is all to play for in this debate, and the positive arguments need to be communicated to people who until now have only heard the case against.

In principle, membership

From Mr Keith Hill MP, and of a sensibly constructed single currency offers significant advantages to Britain. Lower interest rates, lower inflation, greater stability for business, and increased inward investment - all helping to create jobs - are likely consequences of joining the euro in the future. Equally, if the UK decided not to join, the consequence could be damaging, reducing investment and harming

employment. Without a full national debate, the British people will not be able to make up their minds on the merits of

#### Competition in aerospace must be fair and rational

From Professor Philip Laurence and others. Sir, Your editorial on the Boeing/McDonnell Douglas merger ("Brussels on the brink", July 21) overlooks some critical issues in the

EU response to the proposal in the early 1990s the head of General Dynamics, Bill Anders, foresaw consolidation in the US defence/acrospace sector as likely to produce "One gorilla, two chimpanzees and six marmo-

In 1997, we now know this was a conservative estimate - \$100bn-worth of merger later and we have something much closer to three enormous gorillas. The largest of these creatures is the new Boeing with projected sales

of \$48bn. In global terms it is not sonable to be concerned about this concentration of market power. Although Airbus has excelent market share its percentage of aircraft in service is low. The key issue posed by the merger is not McDonnell Douglas's market share, but rather its aircrew in service and the likelihood of customer loyalty if their commercial operation is revitalised.

On a wider canvas no one should underestimate what the mercantilist agenda is for the Clinton administration in high technology industries. Consolidated US

Aerospace Inc is a platform for global domination of aerospace and defence. The new Boeing will be a force in commercial large jets, space and fighters. Its financial strength in itself will have an impact on its competitive relationship with Airbus.

#### Reassuring

Sir, The BBC reports that Lord McAlpine has been appointed leader of the Referendum Movement and will be "calling a meeting of leading figures . . . to decide on the next steps". Also, "a new constitution for the movement has been prepared, but not circulated to members". How reassuring that a rich and influential group, committed to democracy, has appointed itself to watch over the UK's constitution.

Nicholas King, Central Medical Computers, 33 St James's Square

# Caught in the current

As sterling's strength makes exporters struggle, Robert Chote argues that the UK chancellor must grin and bear it

dile hunter from New Zealand, spent the summer of 1949 locked in a garage in Croydon. There he built a vast hydraulic model of the UK economy from perspex tubes, fishing wire and windscreen-wiper motors from a Lancaster bomber.

Coloured water flowed through its valves and sluices, mimicking the way money circulates round the economy. The "pink lemonnational income machine" became a valuable, if unorthodox, teaching aid at the London School of Economics, where Mr Phillips became a professor.

One demonstration was particularly entertaining. One student would be appointed chancellor and put in charge of the valve which regulated the public finances. Another would be made governor of the Bank of England and handed control over interest rates. unco-ordinated policies sent water flooding everywhere.

For now this lesson seems to have been forgotten. Mr Gordon Brown, the UK chancellor, has split responsibility for fiscal and monetary policy between himself and the Bank. Budgetary policy is supposed to stabilise public sector debt and ensure that the government borrows only to finance investment. The Bank has been left to pursue Mr Brown's No one knows inflation target by setting base rates so that demand how high rates for goods and services does ability to supply them.

This demarcation of be raised to

responsibilities takes no account of the way the mix Slow economic of monetary and fiscal policy affects the exchange rate and so how economic activity is spread between indus- Safeguard the tries exposed to international competition and those sheltered from it. But leaving the tradeable sector to bear the burden of disinflation may reduce the long-

ar eller e.

to three features of the proposed merger: that the combined company would have produced 84 per cent of the world's stock of civil aircraft; that Boeing would gain access to governmentfunded research that could be used in civil manufacture; and that Boeing had signed 20-year single supplier deals with three US airlines. Agreement had already been secured on the first two. Yesterday, Boeing offered to drop the exclusive contracts as well.

Some in the European Union will see this as a triumph. The truth is very different. The decision by the EU to intervene in a merger between two US companies with minimal European assets was provocative. The objection to the long-term supply contracts between Boeing and the US airlines looked like an attempt merely to protect the position of Airbus. If so, this was industrial policy masquer-

ading as competition policy. While the long-term contracts

dor repair

tale mor

10

mission's position on the other two was far from persuasive. Boeing's historic dominance of aircraft sales is such that the addition of McDonnell Douglas is a relatively marginal matter. As to the military research and development, it seems to have escaped the attention of most European observers that Boeing triumphed in its confrontation with its domestic rivals despite being - perhaps because it was

- the least engaged in military. rather than civil, production. Yet, on the basis of this strik-ingly filmsy case, the EU was prepared to take the issue to the brink of a conflict with incalcu lable consequences for the fabric of transatlantic relations. Indeed some of the Commission's supporters seem actually to have wanted this dire outcome. Fortunately, they have been disappointed of their hope.

The case of the Commission versus Boeing may now be settled. Fortunately, it also seems unlikely to set a direct prece dent. since the structure of this industry is in many ways unique. Yet serious worries remain. Concern for the fate of particular industries can too easily taint competition policy; and the resultant virility display can also threaten transatlantic relations.

That things seem to have worked out this time does not allay those concerns. On the

# Pluralist politics

A welcome gust of democracy is blowing through Westminster. The government's white paper on devolved government in Wales has been accompanied by the news that the Liberal Democrats are to be given an unprec- centre-left which will leave the edented role in shaping Mr Tony Blair's constitutional erless in their opposition to agenda. A white paper on Scot- political reform. tish devolution will follow tomorrow, with plans for a new be published next week.

geography. After two decades in decentralisation and pluralism. It may be said that the invitation to Mr Paddy Ashdown and his colleagues to join a new bipartisan cabinet committee was a cost-free gesture for Mr Blair. The Liberal Democrats will have a voice in government but no real power. Mr Ashdown also risks tying his party's fortunes

But this was a gesture that the prime minister had no need to make. With a parliamentary majority of 179 and the Conservatives in post-election shock he could quite easily have followed the advice of those in his cabinet who would have preferred to see the Liberal Democrats come an important step

too closely to that of the govern-

# The FT Interview · Dominique Strauss-Kahn

# Pragmatism at any price

France's finance minister tells Andrew Jack and David Owen how he plans to balance social pledges with European commitments

Sitting in his stylish modern office and wearing a dark suit and pin-striped shirt, Mr Dominique Strauss-Kahn looks more like an investment banker than a senior figure in France's new Socialist

Yet Mr Strauss-Kahn, the minister for economy, finance and industry, this week unveiled a set of budgetary measures that have outraged the country's business community. Among other things, his budget for 1997 will raise company taxes on capital gains and profits to 41.6 per cent - one of the highest rates among leading industrial nations.

That has left some in France wondering whether Mr Strauss-Kahn's arrival in office heralds a return to old-style European socialism. For them, some of his arly decisions have undermined his reputation as a moderate politician sensitive to corporate needs and responsive to the evolutions of an increasingly competitive world.

In an interview this week. Mr Strauss-Kahn appeared keen to play up the new administration's pragmatism. "The government holds neither the view that the state should no longer play any role in the economy - especially on budgetary matters - nor the idea that public expenditure is always effective."

Nonetheless he believes the government has a duty to encourage a consumption-led recovery in investment and growth. A business school, and a minister in former Socialist governments, he also sees a redistribution of row." wealth from companies to employees as one way to achieve

Mr Strauss-Kahn says the previous administration led by Mr easures such as raising value His budget - coupled with a "perhaps more important" than lic sector - will help raise con- that spends less but more wastesumption, he argues.

negotiated." As for one of the Socialists' other principal election pledges reduced working bours without any cut in pay - he stresses the distinction between the "slogans" of the campaign from the details of how they will be put into pracnother important tice. "There will not be an overall question is the extent reduction in the total amount of hours worked in the economy.

> He calls business i exaggerated", stressing that the government will emphasise voluntary negotiations and flexibility.

"I sincerely believe that the long-term perspectives for France will be very good because we are an economy in which many structural reforms have not yet taken place - in the banking sector, the labour market, the social protection system and so on." he

"Our margin for adaptation is much more than neighbouring countries which have already carried out their reform, not necessarily with very impressive results. The path is narrow, but I am happy that there is a path. Compared with the situation the [outgoing] Juppé government found in 1995, the challenge of

# BSERVE

#### Out of the running

■ Yesterday's news that there won't be a Portuguese Grand Prix this year should send a frisson of unease well beyond the Esteril race track

Five lavish motor racing circuits are just built or under construction - in Malaysia. South Korea, China, Indonesia and Turkey - and are virtually guaranteed grands prix for next year or 1999. Add the European threats to curb tobacco sponsorship, and Europe must expect some of the 12 rounds it usually hosts in the 16-race

FIA pulled this year's Portuguese race because a \$6m track improvement couldn't be guaranteed on time, and awarded the race to Spain. A government proposal that Estoril could be a 17th race was rejected by the racing teams they think 16 gruelling outings 2 year are quite enough. If that line holds, something will have to give when the new circuits

championship to go up in smoke.

Motorsport's governing body

The wheel turns ■ Yesterday's takeover of Dobbs Automative by Wayne Huizenga's Republic Industries

come on line.

brings US car dealing full circle. The Memphis outfit, founded in 1921 as Hull-Dobbs, was credited with inventing "the System" the way much of the industry moved metal in the 1950s and 1960s. Punters were passed from salesman to salesman, and given the impression that there was some real bargaining going on. while in reality the price was being pushed ever upwards. A spell with the finance people would push the total up even

Consumer power has seen these methods decline, and Huizenea, whose other corporate inventions include Waste Management and Blockbuster has been at the forefront of the move towards fixed-price, no-haggle selling. So the company that reinvented car dealership is being taken over by the company that has reinvented it all over again.

#### Après Nato...

higher.

Russia's many believers in devils, geomancy and the sixth dimension won't have been surprised yesterday when a team of Moscow astrologers came out with an explanation for the unseasonal floods inundating several former Communist countries in central Europe. Alexei Mitrofanov, who chairs the Russian parliament's

affairs, says the astrologers are adamant that the rains were triggered by Nato's decision at its Madrid summit two weeks ago to admit the Czech Republic, Hungary and Poland.

"According to the astrologers.

what happened in Madrid disturbed the spirit of Stalin." Mitrofanov's office said. Maybe it's just as well Nato didn't take up France's suggestion to let in Romania and Slovenia as well. And the admission of a Baltic state would surely have been the cue for Stalin to rise from his grave beside the Kremlin wall and perform a rain dance on Red Sauzre.

#### Motta mouth

■ Brazilian president Fernando Henrique Cardoso seems to have lost patience with communications minister Sergio Motta who, with the stock market heading south on devaluation fears last week, tangled with Cardoso's economic advisers. The market promptly dropped further.

Motta dug himself deeper with a magazine interview in which he managed to criticise four ministerial colleagues, tick off the president for inviting a rival party leader to his home and describe Cardoso's choice for a government post in Minas embarrassment".

Cardoso summoned Motta to a

"dinner" to explain himself on Monday night, where it's believed the president applied a very strong gag. Some Brasilia insiders think he might be for the chop, but he's been one of the president's closest supporters since they met in São Paulo in the early 1970s. his acute political antennae are of great use to Cardoso and, as the government's main fixer until recently, he probably knows where too many bodies are buried to be turned loose.

#### Golden goodbye

After last week's upheavals at AT&T, it's refreshing to hear of a chief executive stepping down gracefully, and rewarding loyal employees into the bargain. Izzy Asper is about to give up the reins at Canadian broadcaster Canwest Global Communications, which also has extensive broadcasting interests in Australia and New Zealand. To mark his departure,

Canwest is handing out C\$1m to its employees, with individual amounts based entirely on years of service. Each will collect between C\$400 and C\$2,500. Asper has looked after himself, too. His salary and bonus came to C\$1.6m last year, his family remains Canwest's dominant shareholder, and Asper will continue to prowi the corridors as executive chairman.

#### Financial Jimes

#### 100 years ago A Brawling Barrister

What is the correct course for all parties concerned in such circumstances as the following? At a dinner party, after the ladies have retired. and while the gentlemen are peacefully discussing their coffee and cigarettes, one of the guests rises from his seat. crosses the room, and, without a word of warning. guests a violent blow in the face . . . I suppose there is nothing for it but to leave the offender to the reprobation of all decently-conducted people. I may add that the foregoing is not a hypothetical case. The incident occurred, exactly as described, at a dinner party given a few nights ago at a private house in London.

#### Palestine and Israel agree to relaunch peace talks

By Lionel Barber in Brussels

Mr Yassir Arafat, the Palestinian leader, and Mr David Levy, Israeli foreign minister, last night said they had agreed to relaunch peace talks suspended since March when Israel started building a Jewish settlement in east

After a "frank and positive" secting in Brussels arranged by the European Union, Mr Levy indicated that he had received important assurances from Mr Arafat on security ssues. The Israeli government has long been pressing the Palestinian leader to crack down against Hamas, the Islamic resistance movement.

"I was very satisfied with the message which I heard from Mr Arafat," the Israeli foreign minister told a news conference. "It (the peace pro-cess) must succeed. We do not

have the right to fail."

Mr Arafat, who called Mr
Levy his "cousin", stressed
the need to rebuild confidence. This included setting up a safe corridor between Gaza and the West Bank, opening an air and sea port in Gaza, and releasing political prisoners.

"We have to continue these meetings in order to continue the peace process which is facing serious challenges," he

Mr Jacques Poos, foreign minister of Luxembourg which holds the rotating EU presidency, made clear that last night's understanding between Mr Arafat and Mr Levy merely extended to relaunching peace talks. It was not an effort to resolve any individual issues.

Both sides would work on a "code of conduct" to avoid fresh obstacles surfacing which could derail the peace talks - an indirect reference to the Israeli government's settlements policy.

The apparent breakthrough round of shuttle diplomacy in the region by Mr Mignel Angel Moratinos, the EU's special Middle East envoy.

Mr Levy and Mr Arafat paid tribute to Mr Moratinos, who has been working alongside Mr Dennis Ross, the chief US Middle East envoy. However. the US has taken a lower profile in recent weeks following the breakdown in contacts

between the two sid Last Sunday, the Palestinian authorities uncovered a cell organised by Hamas. The timing looks more significant after last night's understanding and may reflect concern on Mr Arafat's part that vio-lence in the West Bank could undermine his authority.

Editorial Comment, Page 13

## THE LEX COLUMN Boeing's safe landing

Those who thought the Boeing/ trigger the next equity bear market will have to look for another cause. By standing firm - to the point of

the Commission has forced Boeing to give ground in exchange for approving its merger with McDonnell Douglas. The curiosity is that Boeing's

long-term exclusive supply deals with three airlines, the main sticking point, are really nothing to do with the merger, The first, with American Airlines, was signed before the McDonnell deal was announced. But Airbus, the European consortium which is Boeing's main competitor, will still be pleased that the exclusive contracts are being modified. In practice, the airlines are almost certain to con-tinue to operate a buy Booing pol-icy; it is more convenient both for training pilots and maintenance to have a fleet made up of aircraft from a single supplier. But Airbus can now have a shot at wearing the airlines off Boeing, although its products and prices will have to secome much more competitive if it

That increases the pressure on Airbus to turn itself from a consortium into a proper company to meet the competitive threat from Boeing McDonnell. But, with the world air-frame market fast shrinking into three big contractors - Boeing, Airbus and Lockheed Martin - there is perhaps even greater pressure on their suppliers to consolidate. A splintered supply industry could easily find its profits squeezed.

#### BAT Industries

The last British company to make waves in Mexico was Allied Domecq, and it saw much of its investment in Pedro Domecq go up in smoke with the peac crisis. So it is perhaps surprising that investors welcomed BAT Industries' push into Mexican tobacco through the \$1.7bn purchase of Cigarrera La Moderna (CLM), And this is no bargain. At 12.2 times next year's projected operating profits, BAT is paying almost double the valuation of the UK's two listed tobacco companies. There are no real cost savings. And at a time when investors' appetite for cigarettes is cool, BAT has done a deal which may not enhance next year's earnings, let alone cover its weighted average cost of capital.

FTSE Eurotrack 200; 2676.8 (+37.7)

Philip Morris in Latin America, and RJR Nabisco has given up the chase. This acquisition will mean BAT is market leader in Mexico, Brazil, Chile and Venezuela, leaving Argentina as the only significant weak point. It knows CLM well - it owned and managed it before the introduction of unfriendly foreign ownership rules in the 1970s. It can sell its international brands, like Lucky Strike and Kent, via CLM's distribution network. And Philip Morris paid a higher price to take control of CLM's only real competitor, Cigatam. Phillip Morris will also want a decent return on its investment, which should encourage a softening of recent rigarette price wars. But it does not make this a great deal for BAT.

#### Asian currencies

Dr Mahathir Mohamad, Malaysia's prime minister, is not the first south-east Asian leader to point the finger at Mr George Soros for crippling his currency. But he should know better than most that currency speculation is not a one-way bet. After all, in the early 1990s, Bank Negara, Malaysia's central bank. Was one of the most swashbuckling speculators in the cur-rency markets. But it lost a total of over M\$15bn in 1992 and 1893, before retiring from big-time cur-rency trading. And as a central bank, it would be better placed than

the likes of Mr Soros to get it right. East Asian currencies have succumbed to pressure from traders primarily because they spotted the anomaly of currencies pegged to a strong US dollar when their trade is BAT is already streets ahead of analogous to the European experi-

monetary policy was inappropriate for countries like the UK. And while Asian governments may berate the impact of foreign capital flows, they cannot extricate themselves while they have significant volvo repor

Market to the Plant

external debt. Nonetheless, their currency machismo ignores the fact that devaluation should help rebuild manufacturing competitiveness And in the case of Malaysia, it does not look as vulnerable to further devaluation as, say, Thailand, its current account deficit is less, its economy more robust, and its financial sector in far better shape. The government would be wise to stick to rhetoric rather than taking antispeculative action.

German shareholdings The merger between Bayerische Vereinsbank and Bayerische Hypo Bank opens up a tempting vision: that corporate Germany might be able to unravel its web of strategic shareholdings in a tax-free manner, thereby fostering consolidation and

improving returns. It hinges on a 1958 legal opinion the Touschgutachten - allowing two parties to swap assets without incurring a horrendous 60 per cent capital gains tax bill. To qualify, such an exchange has to fulfil three conditions. The two assets must be of equal value, of equal type - such as two parcels of chares - and of equal function. While Versinsbank was able to exchange its holding in Allianz for shares in Hypo-Bank since both were financial companies, Deutsche Bank would not be able to swap its Dalmier-Benz stake for, say, Commerzbank shares. However, whether a transaction is ultimately allowable depends on a ruling from the local tax office. The authorities in Munich, which oversaw this week's deal, appear to be a lot looser in their interpretation of the rules than those in Frankfurt.

Despite these restrictions, the Touschoutochten is a potentially powerful tool - much of the value of the Bavarian merger comes from the tex-free unlocking of the Allianz stake. The biggest scope for copycat deals lies among banks and insurers, where the cross-holdings are concentrated and consolidation is gathering pace. That explains why German bank shares jumped nearly 10 per cent yesterday.

The government bas also called on the banks to provide emergency loans to some of Kia's 5,000 subcontractors to prevent hankruptcies among them, but the banks have been cautious in response. On Monday, Kia submitted a

restructuring plan under which it hoped to raise Won4,160bn through property sales and the disposal of its lossmaking steel unit. It said it would reduce the number of its affiliates from 28 to 14, throughout the group.

Analysts were impressed. "It's like sticking agement control and accept your fingers in a leaky dam responsibility for the group's that's about to burst," said Mr Henry Morris, a managing tional (HK), a Korean investment group.

a buyer for its steel business. The industry is already lapse of the Hanbo and Sammi steel groups earlier this year," said Mr Daniel Harwood. north-east Asian manager for ABN-Amro Hoare Govett Asia Securities.

"More important. I'm sceptical whether Kia can raise a nned Won3,000bn through land sales because the property market is weak due to distressed land sales by other groups in financial trouble."

The banks have also asked selling companies such as Kia Kia to sell its heavily indebted Motors. They demand that Kia not produce a firm schedule for disposal of its assets, which include a hotel, a professional basketball team, and property belonging to Asia Motors in the city of Kwangju.

Kia said it could cover the shortfall in its emergency Kia is expected to find it funding request through the hard to raise capital from sales of heavily discounted sales to service its debts. "Kia cars this month.

#### Firm appoints its first non-US worldwide managing partner | Versace insured for \$20m at Lloyd's

By Christopher Adams, Insurance Corresponder

Gianni Versace's fashion empire could struggle to survive without him, but an insurance policy protecting the business against his death may go some way towards compensating for the loss of such a crucial figurehead.

Mr Versace, shot dead last week outside his Miami home. was insured at Lloyd's of London for L35bn (\$20.01m) under the terms of an insurance policy taken out by his company. Underwriters say the group has yet to make a claim

The so-called "key man" policy that covered the group against his death is not insurance broker, died in a helicopter crash last year, his company Benfield claimed E16m (\$26.7m) with its policy.

It is impossible to measure the precise financial impact of the loss of Mr Versace, but underwriters typically calculate the insurance premium they charge by looking at the salary of a key man, the financial performance of the company he manages and his position within it.

"With Versace, it would have been his designing ability, his contacts and the people he was seen with. He was very much upfront. Because it's got his name, it sells," said one underwriter.

Mr Versace not only founded his business and designed the products which bear his name, but the close relationship between brand recognition and his flamboyant public persona has helped drive the compa-

Dy's success. It is not just businesses that take out key man policies. Highly paid American footballers are often similarly covered against injury and the policies can insure sums of up to \$100m. It is often smaller businesses, rather than large ones, which are most at risk from the loss of a key executive.

why people buy them is when there's a change in the structure of the company. If a bank is putting money in, it may insist on a key man insurance policy to protect its invest-ment," said a broker.

The insurance policy covering Versace was led by an insurance syndicate at Lloyd's managed by the RJ Kiln underwriting agency.

Parts of the corporate sector in France are in tune with the shareholder value ethos. There are attractive plays on individual stocks. But corporate plans that dump a bigger surplus labour problem on to the public purse will be blocked by the Jospin government. Meanwhile, more of the cost of maintaining the bloated public sector is being heaped on companies through the "tempo-rary" corporate tax surcharge.

Only 48 per cent of French households include a private sector wage earner, according to Credit Suisse First Boston's French economics weekly. Without a U-turn on private sector job creation France will be unable to survive within the single currency. For the time being the French stock market will continue to underperform. But watch for a rapid catch-up on any signs of labour market reforms.

# Provisions hurt Thai financial sector

By Ted Bardacke in Bangkok

Leading Thai financial institutions reported disappointing first-half results yesterday amid worries that already high levels of provisioning for had debts will increase later in the year.

Bangkok Bank, the country's largest bank, reported a 16 per cent fall in first-half net profit to Bt8.63bn (\$283m). State-owned net profit was down 36 per cent to Bt3.8bn, while Thai Farmers Bank Bt159.8m. first-half net profit was 19 per cent

lower at Bt5bn. Siam Commercial stemmed mainly from a rise in pro- shares based on profit figures. reported a 14 per cent fall to Bt3.68bn.

In the finance sector, Finance One, once the country's largest finance company, said it swung to a first-half net loss of Bt5.23bn compared with a profit of Bt850m in the same period last year. At Dhana Siam, first-half net profits fell 82 per cent to Bt131.9m, while Krung Thai Bank said its first-half Nava Finance & Securities reported a 71 per cent fall to

Analysts said the fall in profits

Bank, the fourth-largest bank, visioning for bad debts. Thai financial institutions usually wait until the fourth quarter, when they can assess full-year performance, to forming loans and small exposure make large provisions. Increasing provisions in the middle of the year meant bankers expect badloan problems to get Worse, ana-

> Some analysts suggested that the and were unlikely to sell down that commercial banks can offer

The fact that Bangkok Bank which already has high provisioning levels, relatively few non-perto Thailand's collapsing property developers - raised provisions was taken as a sign that manufacturers were also starting to show up on the bad-debt rolls.

Analysts expressed concern that institutions had increased margins, which they said remained provisions at this point in the year healthy in the first half, would fall because investors had already in the second. The central bank discounted poor 1997 earnings raised the ceiling on interest rates

their depositors from 12 per cent to 14 per cent, prompting Bangkok Bank and Thai Farmers to raise their deposit rates by 3 and 2.5 percentage points respectively.

The move came after banks reported they were losing depositors to foreign banks operating in Thailand, which are less bound by interest rate restrictions.

Combined with lower margins, falling loan growth will also depress profits through the year. Even the healthiest banks are reluctant to lend in the unstable ASIA-PACIFIC NEWS DIGEST

# Bank dismisses Ssangyong talk

The main creditor bank of Ssangyong Motor yesterday denied it would place South Korca's fourth-largest car company under bankruptcy protection because of mount-

Ssangyong blamed the rumours - which caused the Seoul bourse to fall 2 per cent yesterday to 725,98 points on investors and traders who were seeking to drive down the share prices of Ssangyong companies in order to buy them cheaply. The share prices of most listed Ssangrong subsidiaries, including its main oil refining and cement businesses, fell by their daily limit yesterday. The Scoul stock market has been jittery since leading banks last week rescued the Kia group, Korea's third-largest car-

maker, from near-bankruptcy.

Ssangyong Motor has been a cause of concern among investors because of its total losses since 1892 of Won500bn (\$558m) and debts of more than Won3,000bn. Cho Hung Bank, the biggest lender to Ssangyong Motor, said the company's losses "aren't serious enough to force it to go insolvent at this time. There is no possibility of the company going bankrupt in the near term." Ssangyong group finances are considered stronger than those

Ssangyong Motor has been mentioned as a possible takeover target for the Samsung group, which plans to begin car production next year. Ssangyong has denied begin car production usas y and intention of selling the car company.

#### ■ BAKUN DAM PROJECT

#### Malaysia PM aims to reassure

Dr Mahathir Mohamad, Malaysia's prime minister, yesterday sought to allay concern over the M\$13.6bn (US\$8.2bn) Bakun dam project. Doubts over the project, which is one of Malaysia's biggest infrastructure undertakings, were reinforced by recent remarks from Mr Anwar Ibrahim, the deputy prime minister, that crucial differences existed between the lead contractors and the Malaysian managers of the dam.

The dam's lead contractor is ABB, the Swiss-Swedish engineering group. Ekran, the Malaysian company managing the project, has demanded that the contract with ABB should be renegotiated, industry sources said. Dr Mahathir said: "Of course, some people may not be happy. Some people, perhaps, have personal views about certain things. But we will overcome these."

# **China** venture in profit

By James Harding in Shanghai

Volkswagen's joint venture with China's First Auto Works, the large stateowned enterprise, has posted its first profits since it was established in 1991, reinforcing the German carmaker's lead in the Chinese market

The joint venture, which is based in Changchun, north-east China, recorded a 45 per cent increase in production of Jetta saloon cars and a post-tax profit in the first half of 1997, according to the Chinese state news

Volkswagen-FAW declined to detail the profit figures. The German group controls more than half of China's passenger car market through sales of its Santana model, which is produced in Shanghai in a venture with Shanghai Automotive Industry

Corporation. Approximately 200,000 Santana cars were sold last year - about 52 per cent of total passenger car sales while the Jetta commanded 6.9 per cent of the market, with sales of 26,400.

The Jetta's market share is forecast to rise to 10 per cent by the end of this year, after sales reached 20,100 cars in the first six months of this year - an increase of 102 per cent compared with the same period in

The Changchun assembly line has a production capacity of 150,000 cars a year. but it has not been stretched by China's sluggish automotive market.

In the first six months of this year, the Volkswagen-FAW joint venture produced 20,600 Jetta cars.

Car sales in China have to 1.07m units. stalled over the past three years, held back by the limited purchasing power of Chinese consumers and squeezed further by the government's drive to cool rampant inflation.

# Push into retail market lifts Petron

tive to the Manila Composite

By Justin Marozzi

Petron, the Philippines' largest oil group, yesterday announced first-half net profits up 13 per cent to 2.25bn pesos (\$80m), but analysts warned the company would be hit by the recent depreciation of the peso.

The group said the improved performance came from higher revenues arising from its push into the retail market. Revenues rose 13 per cent to 29.4bn pesos, and market share was "dominant" at more than 40 per

Nippon Credit Bank, Japan's smallest long-term credit bank, yesterday announced a restructuring that will split the group into three separate units.

The move, which is unusual among Japanese hanks, aims to boost business control and improve It comes as a growing number of Japanese banks

are considering ways of reorganising their structures. including the introduction of holding companies, to create a sharper business focus. NCB is stepping up its efforts to convince investors it has a viable future. In 1996 the bank recorded a Y350.16bn (\$3bn) fiscal loss. partly because of the writeoff of bad loans incurred

after the collapse of the 1980s property bubble. The bank unveiled a

¥291bn recapitalisation in April. which involved other private-sector banks purchasing Y70bn of shares and life and non-life groups purchasing Y97bn worth of shares.

The plan initially met with industry resistance. However, NCB yesterday said the banks and life assurance groups had agreed to take part in the scheme, which is likely to be completed by the end of this month.

One of the new units. "New NCB", will focus on providing securitisation and other banking businesses for small and medium-sized companies. "What we want to target is the smaller businesses which may not have a main bank," the bank said.

Another unit, "Project NCB", will handle the property side of NCB's business A third, "Market NCB", will focus on asset management and risk management and

#### Jinro plans Won500bn asset sales

Jinro, South Korea's largest liquor group, yesterday said it planned to raise an extra Won500bn (\$558m) by the end of July through asset sales as it sought to persuade banks

to extend bankruptcy protection for a further two months Jinro was the first beneficiary of a recent bankruptcy prevention agreement among Korean banks to avoid big corporate collapses resulting from an economic downturn. Protection has also been applied to the Kia car and Dainong retail groups. Bankruptcy protection for Jinro is due to expire by the end of this month, but Jinro has raised only Won400bn through sales of its Jinro Engineering and Jinro Hi-Living units to pay off debts of Won2.600bn to the banks. Jinro said it needed more time to raise capital to service its debts as it sought to sell 12 of its 18 subsidiaries, which it estimated would result in gains of Won1,400bn.

#### The SKF Group, operating in 130 countries, is the world's leading producer of rolling bearings.

REPORT ON OPERATIONS FOR THE SIX MONTHS ENDED JUNE 30, 1997.

SKF's consolidated income, after financial income and expense, in the first half of 1997 amounted to SEK 1 103 m, compared with SEK 1 475 in the first half of 1996. Income in the second quarter of 1997 totalled SEK 602 m, compared with SEK 664 m in the second quarter of 1996, and SEK 501 m in the first quarter of this year.

Group sales during the first six months of 1997 amounted to SEK 18 747m (17 528), an increase of 7 percent compared with first-half 1996 sales. Sales in the second quarter this year totalled SEK 9 883m (8 647). Earnings per share, after tax, amounted to SEK 5.90 (7.90).

#### MARKET OUTLOOK

The Group expects that the favourable trend of volume in markets outside Western Europe will continue. The improvement in demand now appearing in Western Europe should result in gradually rising sales in this market during the second half of the year.

EUROPEAN NEWS DIGEST

# **BASF** potash sale blocked

BASF, the German chemicals group, has been blocked from selling a controlling stake in its German potash mining interests to Potash Corporation of Saskatchewan, the world's biggest integrated fertilisers group.

Mr Gunter Regrodt, German economics minister, yester day upheld an earlier ruling by the federal cartel office in Berlin forbidding the planned sale of 51 per cent of Kali und Salz to PCS. The office had ruled that the sale would lead to a "considerable limitation of competition" on the German market for potash fertilisers.

BASF can challenge Mr Rexrodt's decision in the courts, although this would be unprecedented. The group said yesterday it would begin looking for a new buyer. Its withdrawal from potash mining is part of an ambitious refocusing on its core chemicals and pharmaceuticals operations. PCS said yesterday it regretted Mr Rexrodt's

The minister said the sale would have left Kali und Salz, which already controls 80 per cent of the German market for potash, with "no effective competition". Mr Gerhard Wolf, BASF board member responsible for Kali und Salz, said the decision was a heavy blow to the German potash industry.

SOFTWARE

#### Dassault Systemès ahead 54%

Dassault Systèmes, the French provider of design and manufacturing software, yesterday announced net profits of FF777.5m (\$12.8m) for the second quarter, a 51 per cent rise from the same period a year earlier. Sales were up 30 per cent at FF1379.1m. Financial revenues were down to FFr14.6m, from FFr33.3m, mainly due to smaller net gains from currency fluctuations.

The company, which is 38 per cent owned by Dassault Aviation, the aircraft manufacturer, attributed the rise to "all-round excellent performance". Mr Charles Edelstenne, chairman and chief executive, said releases of new products had received a "favourable response from cus-

For the six months to the end of June, total sales were FFr802.1m and net profits FFr193.8m, up from FFr621.8m and FFr136.8m, respectively, in the first half of 1996.

The company warned it was likely to suffer from the French government's recent decision to increase corpo-Samer Iskandar, Paris

#### Two shortlisted for CSI

The Spanish government has narrowed the contenders to control CSI Corporación Siderúrgica, the chief domestic steel producer, down to Usinor of France and Arbed of Luxembourg. However, it wants both companies to finetune their hids before it makes a decision on the sale. The State industrial Agency (AIE) said it had excluded rival offers from Italy's Riva-live group and US Steel, but that the two remaining bidders had failed to satisfy all the conditions it had laid down for the purchase of 35 per cent of CSL it gave Usinor and Arbed until July 28 to improve

CSI, which had net earnings of Pta15.6bn (\$103m) last year on sales of Pta306bn, is the last big steehnaker in the European Union that is still in state ownership. Once AIE decides on CSI's main partner, it will place 10-15 per cent of the company's shares with domestic industrial interests and float the remainder on the stock market.

#### Portugal's BES beats forecasts

nco Espirito Santo. Portugal's fourth-largest bar lifted first-half net consolidated profit 42.9 per cent, from Es10.5bn in the same period last year to Es15.2bn (\$83.8m) - more than Esibn above analysts' forecasts. Mr Ricardo Espírito Santo Salgado, BES president, said

yesterday the group's strategy of organic growth had enabled it to double total assets over the past three years and increase market share. Net assets rose to Es3,846bn in the first half, up 25.9 per cent on the same period in 1996. Analysts consider BES to be the only Portuguese bank with the capital and managerial resources to make an important acquisition. It strengthened its capital adequacy last month by issuing Es74bn in subordinated debt.

**■ GENCOR** 

#### Four vie for chief executive post

Four people will battle to become chief executive of Gencor, the South Africa based gold and platinum producer demerged from the Billiton base metals business, which is about to float on the London Stock Exchange.

The contenders include Mr Tom Dale, who heads Gencor's South African gold business; Mr Mick McMahon, chairman of Impala Platinum; and Mr Gary Maude, who is responsible for the international gold operations. The fourth candidate will be Gencor's new finance director, who has yet to be appointed.

Announcing his candidacy yesterday, Mr Dale said the board would consider splitting off the Impala platinum business, in which Gencor has a 46 per cent holding, if it became clear shareholders would benefit from Gencor being a "pure" gold, rather than a precious metals group.

It was also likely that the structure of the South African gold business would be changed.

Kenneth Gooding, Mining Correspondent

#### **■ BULGARIA**

#### Bank privatisation completed

Bulgaria yesterday completed the first privatisation of a state-owned bank by transferring 65 per cent of United Bulgarian Bank to Oppenheimer, the US securities house, and the European Bank for Reconstruction and Development. The conclusion of the much-delayed deal was a condition set by the International Monetary Fund for Bulgarla to receive the next \$140m tranche of a \$650m stand-by loan approved earlier this year.

Oppenheimer acquired 30 per cent of United Bulgarian on behalf of its emerging markets funds, while the EBRD took 35 per cent. The remaining 35 per cent went to Bulbank, the biggest state-owned Bulgarian bank which is due to be privatised next year. The three will participate later this year in a \$30m rights issue to raise United's equity base to \$42m, in line with international capital adequacy standards. The bank's management is also being restructured, banking officials said.

Theodor Troev, Sofia and Kerin Hope, Athens

#### CZECH REPUBLIC

#### EBRD takes Korado stake

The European Bank for Reconstruction and Development is taking a 44.3 per cent stake in Korado, a Czech maker of heating radiators which has become one of the biggest companies of its kind in central Europe. The EBRD said yesterday it was paying Kčl.1bn (\$32m) for the stake, which is in the form of new equity.

Korado is seeking to quadruple output in the next few years, and the EBRD financing will allow it to buy tech nology for a new plant. The company makes 750,000 radiators a year, up from 20,000 at the time of its privatisation in 1991. The surge is attributed mainly to sparing demand for radiators because of housing reconstruction in postcommunist central Europe. Vincent Boland

# Hard drive to market for Olivetti PC

Personal Computers, the Italian PC manufacturer spun off by the Olivetti have been frustrated by the group, is finally free to get on with the business of designing, building and selling PCs.

# CIBC to buy Oppenheimer for \$525m

By Tracy Corrigan in New York

CIBC Wood Gundy, the investment banking arm of Canada's second largest bank, has agreed to buy Oppenheimer, the second largest privately-held securities firm in the US, for a total of US\$525m.

The deal is the latest in a spate of acquisitions of US securities newly formed CIBC Oppenheimer, firms by commercial banks, following the loosening of rules governing such ownership.

AMERICAS NEWS DIGEST

# Wall St cool as IBM rises

International Business Machines shares fell \$34, or 3 per cent, to \$100% at mid-session yesterday in spite of higher than expected second-quarter earnings, boosted by a drup in the computer company's tax rate. Although net income exceeded analysts' forecasts, investors were disappointed by revenue growth and almost flat pre-tax earnings.

Net earnings for the quarter ended June 30 were \$1.4bn, or \$1.46 a share, compared with \$1.3bn, or \$1.26, in the same period last year. Wall Street analysts had forecast about \$1.42 Revenues for the quarter were \$18.9bn, an increase of 4 per cent from \$18.2bn a year ago. Measured in constant currency, revenue growth for the quarter was 8 per cent However, IBM lowered its overall tax rate from 38.1 per cent a year ago to 33.7 per cent. The drop. achieved partly by shifting manufacturing operations to countries with lower taxes, added approximately 10 cents a share to not income.

Louise Kehoe. Son Francisco a share to net income.

OIL RESULTS

#### Texaco falls 18%

Lower refining margins in its west coast plants and weaker oil prices cut unadjusted profits at Texaco by 18 per cent to \$571m in the second quarter, but the energy group still managed to top analysts' forecasts by a wide margin. Net income, before one-time gains in both periods, was \$440m compared with \$465, and translated into \$1.64 a share, against \$1.73 last time. Forecasts were \$1.53.

Revenues, at \$11.5bn compared with \$11.3bn, reflected lower oil and natural gas prices and the effect of over-supply on margins at the petrol pump. US refining, marketing and distribution divisions - soon to be pooled in a cost-saving joint venture with Shell Oil and Star. the Saudi Aramco brand - recorded a 40 per cent drop in

operating profits before special items. Amoco said its higher second-quarter net income of \$622m, against \$600m for the year earlier, reflected stronger refining margins and increased volumes in petroleum products and most chemical lines. Lower worldwide crude oil prices and lower North American crude oil and natural gas production partially offset those gains and pulled revenues down to \$8.6bn, compared with \$8.8bn in the 1996 Christopher Parkes, Los Angeles second quarter.

**■ OIL TAKEOVERS** 

#### UPR urges Pennzoil to sell

Oil producer Union Pacific Resources yesterday claimed "overwhelming" stockholder support for its \$6.4bu bid for Pennzoil. The company said shareholders representing 61.5 per cent of outstanding Pennzoil stock had tendered to accept its \$84-a-share cash offer in the two-part bld. UPR, which has launched lawsuits in an attempt to breach its target's anti-takeover defences, said: "We urge Pennzoil's board to listen to its shareholders and do the right thing by directing management to negotiate a combination with UPR." Christopher Parkes

#### **II TELECOMMUNICATIONS**

#### Nortel beats expectations

Northern Telecom, the Toronto-based telecommunications equipment supplier, reported higher than expected sec-ond-quarter earnings, in spite od US\$85m in pre-tax writedowns and restructuring charges. Nortel was buoyed by strong orders from US phone companies, which more than offset faltering public switch sales in China. Mr John Roth, chief operating officer and chief executive-designate, said "the whole China market is pulling back a little bit" as public spending priorities shift from telecoms to energy and agriculture. Net earnings climbed from \$106m, three months to June 30. Revenues surged 26 per cent to \$3.79bn. Order inflows grew from \$3.08bn to \$3.69bn. The latest results include a \$102m pre-tax gain from two dis-Bernard Simon, Toronto

#### **■ COMPUTER MANUFACTURING** Tandem jumps 85%

Tandem Computers, the computer manufacturer that last month agreed to be acquired by Compaq Computer, saw third quarter earnings jump 85 per cent. Net income for the quarter ended June 30 was \$43m, or 36 cents a share. compared with \$23m, or 20 cents, in the same period last year. Revenues from continuing operations rose 5 per cent to \$503m, compared with \$466m. Louise Kehoc

#### ■ GOLD

#### Barrick Gold bucks price slide

Barrick Gold's second-quarter earnings fell 10 per cent, due partly to lower output and higher costs at the El Indio mine in Chile. The Toronto-based company, one of the largest gold producers outside South Africa, was unaffected by the recent slide in the bullion price. The average price realised in the quarter climbed from US\$417 to US\$420 an ounce. Barrick has hedged 8.5m ounces, equal to about three years production. Cash operating costs were little changed at \$186 an ounce. Net earnings dropped from \$69m, or 19 cents, a year earlier to \$62m, or 16 cents, in the three months to June 30. Mr John Carring-

ton, president, forecast higher earnings and cash flow for Bernard Simon

#### ■ HEAVY MACHINERY

#### Caterpillar buoyed by US sales

Caterpillar, the heavy machinery group, said net profits in the second quarter rose from \$374m in the same period last year to \$435m, pushing earnings per share from 97 cents to \$1.15 on sales up from \$4.2bn to \$4.9bn. It said its sales inside the US were \$2.42bn in the current quarter, a 20 per cent increase on last year, due mainly to higher industry demand for machines and engines. Sales outside the US rose 14 per cent to \$2.26bn, with improved physical sales volume contributing to the increase. The company said it expected to see net sales and profits "moderately higher" in the second half of this year compared with last Agencies, New York

#### ■ MACMILLAN BLOEDEL

#### Weak prices hit forestry group

MacMillan Bloedel, Canada's largest forest products company, has reported a C\$5m (U\$\$3.60m) loss in the second quarter, its third consecutive quarterly loss. The company said the loss, on sales of C\$1.5bn, reflected weaker prices for board, paper and packaging, as well as a slowdown in the Japanese lumber market. The results for the period ending June 30 were worse than market analysts had Scott Morrison, Vancouver.

#### ■ AIRCRAFT ORDERS

joint venture, for 24 British Aerospace RJ85 jets.

earnings of 39.7p (19.7p). The shares fell 13p to 724p. Separately, Mr Sandy Anderson intends to step down as chief executive of Porterbrook, a subsidiary which leases rolling stock. But Mr Anderson, who staged the original management bay-out of the company, will handle forthcoming rail orders and will remain chair-

### LEX COMMENT Littlewoods

Mr James Ross must be thankful there is no Littlewoods share price to tes-tify to the group's agonies. He had a good start as chairman, getting the Moores family, who control the business, to accept a separation of ownership and management. But subsequent progress has been distinctly ragged, with the mid-week lottery dealing a further blow to the pools business, and the bid for Freemans remaining

Littlewoods Pre-tax profits (Om) 1902 93 94 95 96 95 96 -96 -97 messy and unresolved. It is the stores division. Source, Company

though, that has been attracting the headlines. Mr Ross's decision to sell some to Marks and Spencer, while reformatting the balance of the portfolio, may be the best of a had set of options; even so, it is hardly compelling. Certainly, more focused target-ing of the group's core customers, middle aged women through a more coherent store portfolio, represents an improvement on the status quo. Better use of the property assets will also provide some stable income. But there remains a big risk that this strategy will not deliver promised returns, in which case Mr Ross would have done better to be rid of the stores en bloc, even at a lowprice. For the Moores family, the one consolation is the rea

sonable health of its core business, home shopping. Littlewoods has outsmarted its main rival GUS on the agency side, and is making successful inroads into the direct business through Index Extra.

Still, with return on equity a dismal 6 per cent, Mr Ross has a long way to go to convert Littlewoods into a decent

# BT still hanging on the line |CU builds up

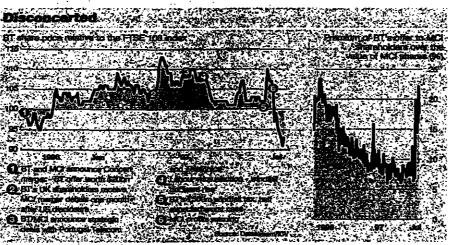

#### Further pressure on its shares is likely, says Clay Harris

British Telecommunications' share price has slid sharply since MCI Communications, its US partner in a proposed marriage, announced that breaking into the US local telephone market would cost it an extra \$1.8bn in the next

BT shares have fallen nearly 16 per cent from the closing high of 501½p reached on July 4, even after recovering 7%p to 423p yesterday on an interconnection charges proposal from Oftel, which was deemed positive for the company.

But leaving aside the uncertainty over the Concert merger, which BT and MCI resolved. executives are trying to salvage in talks in the US, telecoms analysts expect BT's share price to face further pressure in coming weeks.

Embedded within BT's price is nearly 47p in dividends due to be paid on September 12. One part is the 1996-97 final of 11.95p; the other is a 35p special distri-bution for BT holders, intended to sweeten the MCI

ented investors has helped buoy the BT price in the choppy waves stirred up by MCL Once the shares go exdividend on August 11, they may be vulnerable to new pressure, especially if the MCI issue has not been

One City analyst said yesterday the shares could trade as low as 350p after that date. Others saw 380p as more likely.

Investors chasing after the big chunk of income have helped to offset selling by arbitrageurs, who have been trying to take advantage of the gap between the fluctuating value of BT's shares- ment's windfall tax. BT and-cash offer and MCI's escaped relatively lightly MCI talks, it is likely that

over the MCI share price had shrunk to 6 per cent by early this month, reflecting the growing belief that the deal would go ahead, since most regulatory hurdles had been cleared. In the past fortnight, after MCTs warning, the premium has trebled, even taking into account the slide in BT's price.

The conflicting technical

pressures on the price are

nothing new. "BT hasn't traded on fundamentals in nine months - it's traded on technicals," said one analyst. Political attention and market commentary may have focused on the govern-

tions. Coincidentally that £500m difference is similar to the \$800m extra that MCI said it would have to spend this year.

BT's share price received a bigger boost from institutions assiduously adding to their holdings in anticipation of greater portfolio weightings that would be required post-MCI.

The star-spangled excitement of the MCI deal, although now looking distinctively tarnished, also may have enchanted BT followers into accepting a more rosy view of growth prospects than justified. Whatever the outcome of the BTwith a £500m bill - about attention will now focus deal. share price. with a £500m bill - about attention will now to be a case prediction of the offer half the "worst case" prediction on fundamentals.

# UFF stake in FFr1.29bn deal

By Christopher Adams, nsurance Correspondent

Commercial Union, the composite insurer, yesterday moved to strengthen its life operations in France with the acquisition of a 55.8 per cent stake in Union Financière de France for increase in new business FFr1.29bn (\$210.4m) from from sales of life, pensions Credit Agricole Indosuez.

"We've had nothing but buyers today, with buying of the two year note against the back end of the curve. said Mr John Spinello, government securities strategist at Merrill Lynch.

Weakness in the long bond price drove its yield above 6.5 per cent in Monday trading, days after it hit its lowest yield since late last year. With little new economic data to drive the market, the Fed chairman's remarks about inflation and economic growth could lead to

# group poised for \$2bn deal

By Edward Luce in London and Louise Lucas in Hong Kong

Hutchison Whampon, one of Hong Kong's leading blue chip companies, is expected this week to launch the first significant bond by a Hong Kong company since the former UK colony was returned to Chinese sovereignty at the start of this month.

Bankers said the eurobond expected to be launched in four tranches - could amount to \$2bn, twice the size of the original planned total. "There is obviously very strong demand for such rare paper," said one dealer in London. "It is not often that Hong Kong companies come to the market and when they do, investors are usually enthusiastic.\*

Analysts said currency turmoil in south-east Asia including devaluations of the Thai baht and Philippine peso - had boosted the attraction of Hong Kong debt to overseas buyers. The Hong Kong dollar is pegged to the US dollar. There is Kong dollar coming under speculative attack," said one economist. "It is a safe haven for investors."

The bond, to be lead-manged by Merrill Lynch and Goldman Sachs, is expected to include 10, 20, 30 and 40veer tranches with a 12-year out option on the 40-year.

Hutchison Whampoa has been one of Hong Kong's most aggressive corporates in the international equity and syndicated loan markets. Last year it signed a US\$1.5bn long-term loan

Hong Kong corporates have traditionally been debt averse: partially because it goes against the grain of family ownership and support, but also due to the ease of raising equity in Hong Kong, which has deterred many corporates from seeking the credit ratings necessary for bond issues. However, the trend began

ithe

to change in 1993, when a vogue for convertible bonds - a halfway house between bonds and equity prompted blue chips such as Wharf (Holdings) to acquire ratings. Other conglomerates and property developers. including Swire Pacific and Sun Hung Kai Properties. followed suit.

More recently, Peregrine Investments Holdings, the pan-Asian merchant bank, obtained a rating this year from Japan Bond Research Institute as part of its efforts to expand its funding base.

Traders believe there is now a window of opportunity for Hong Kong corporates to tap the bond markets, as fund managers are no question of the Hong scrambling for places to allocate Asian funds.

Hong Kong's large reserves and sound economic fundamentals have convinced most analysts it would emerge unscathed from attack by speculators.

But corporates seem slow to exploit this opportunity. Only Hopewell Holdings, the infrastructure company, is said to be considering a bond issue - more than two years after scotching a similar plan when it received a lower than expected credit rating. Market sources suggest Hopewell is looking to
